The
New St. Regis
Ever Bearing
RASPBERRY

L.W. HALL & COMPANY
The Eagle Wholesale Nurseries
111 Rochester, New York. 111

Particulars About Ordering

Order Early. All orders should be sent in as early as possible. It is our rule to fill orders in rotation as received, hence we can not, except for extraordinary reasons, delay orders first received for those coming late in the season.

How to Order and How to Remit. All orders should be written out on the order sheet herein. Write plainly and be sure to give Name, Address, Railroad and Express Company. Payment should be made either by P. O. Money Order, Express Order, Check, Bank Drafts or Registered Letter. Terms are Net Cash with order, except where otherwise arranged by mutual agreement.

Boxing and Packing. We make no charge for boxing and packing. All goods delivered free to freight and express companies. On all orders amounting to \$5.00 or over we will prepay freight east of the Mississippi River. All stock is carefully packed and sure to reach customer in the best condition.

Shipping. Tell us just how and where you want goods shipped. It is very seldom anything goes astray. Strawberries should always be sent by Express or Mail.

Quantities. 25 and 50 at hundred rates; 250 and over at thousand rates.

Guarantee. While we use the greatest care to have everything we send out true to name, we accept order only on the condition, that should anything prove untrue to name, we will replace it free, but are not liable for any amount greater than the original price paid to us.

Shipping Seasons. Our Spring shipping season opens in March and continues along in May. In the Fall we start shipping about October 1st and continue to about December 1st.

Claims for Deduction must be made immediately on receipt of goods. No claim will be allowed for delay or loss by transportation companies. They must be held responsible.

On all orders amounting to \$5.00 or over we will prepay freight
East of the Mississippi River.

Discount for Early Orders

On all cash orders for stock selected at regular catalogue prices, received before March 15, we will allow a discount of 5 per cent. in trade, thus enabling you to select \$1.00 worth of stock for 95c. No discount allowed on Special Bargain Collections.

Free Premiums

With all cash orders amounting to \$2.50 we will send one St. Regis Everbearing Red Raspberry, the wonderful new raspberry bearing fruit four months of the year.

With all cash orders amounting to \$5.00 to \$10.00 we will send free 3 St. Regis Raspberries.

Orders amounting to \$10.00 to \$15.00 we give 6 St. Regis Raspberries free.

Orders amounting to \$15.00 or more we will send One Dozen St. Regis Raspberry Plants as free premiums.

COPY OF CERTIFICATE OF INSPECTION ACCOMPANIES EACH ORDER.

No. 604.

State of New York, Department of Agriculture.
Certificate of Inspection of Nursery Stock.

This is to certify that the stock in the nursery of L. W. HALL & CO., of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and it was found to be apparently free in all respects from any contagious or infectious plant disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1913.

Dated Albany, N. Y., October 4, 1912.

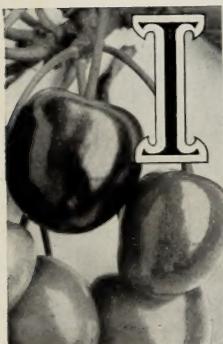

CALVIN J. HUSON,
Commissioner of Agriculture.

Our nurseries have been inspected by the State Inspector for San Jose scale and other dangerous insects and diseases, in compliance with the laws of New York, and have been found free of such troubles. A certificate of the inspector will accompany every sale and shipment as required by the law. All shipments will be fumigated upon request.

10-9-13

Buy Rochester Grown "Hall's Quality" Fresh Dug Nursery Stock

NPRESENTING our latest General Catalogue we offer all the best of the old kinds and in addition many desirable new varieties, with full descriptions. We thank all of our friends for the liberal patronage extended to us in the past, and assure them that we will endeavor to merit a continuance of same for the future. To those who have had no dealings with us we desire to say a few words why we think it to your advantage to favor us with your order.

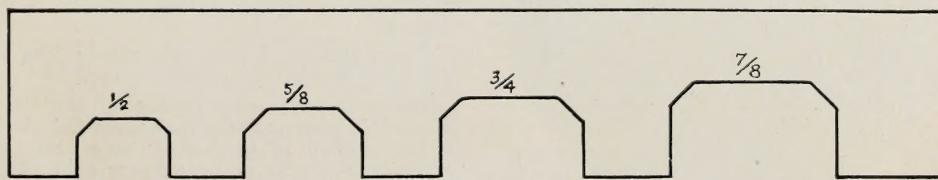

Location. Rochester is known as the Largest Nursery Center in the world. Located at the lower end of the famous Genesee Valley, near the shores of Lake Ontario, with a wide range of temperature and soil especially adapted for growing strong, vigorous trees and plants, we are able to offer stock that is superior to any grown in any other locality. Nurseries at Rochester, N. Y.; Brighton, N. Y.; Irondequoit, N. Y.; Penfield, N. Y.

We grow our own stock, and everything is **fresh dug in the spring;** we have no cold storage. Our Mr. Hall, Senior, has been engaged in growing high grade nursery stock here at Rochester, N. Y., for the past 40 years.

He is an expert in all branches, all the growing of stock is done under his direct supervision, and he personally cuts all the buds for the budding of the varieties. We know that the stock we offer is right and is grown right, and in buying of us you are dealing with responsible and reputable growers who have been growing trees and plants continuously for nearly 40 years. We guarantee to deliver trees and plants that are of the highest grade and quality—healthy, thrifty and free from San Jose scale or disease of any kind.

Prices. Remember that price is important, but quality must always be your first consideration. It costs more to produce a good tree than a poor one. You cannot afford to buy anything but the best grade of warranted stock. It is not necessary for you to pay fancy agents' prices in order to get best quality stock. Buy direct of us through our catalogue and get the best trees you can buy at the lowest prices in keeping with guarantee of quality. Give us a trial and let us prove to you that we have the right trees at the right prices. Your money back if not satisfied.

Grading and Size of Trees. Among the wholesale trade there is a standard of caliper and height for each grade of stock. All nurserymen, but not all planters, know that it is the caliper or diameter of the tree, rather than height alone, that governs the price. A great many nurserymen selling through catalogue mention height but not the caliper of their trees, and consequently can put into their largest grade many trees that would naturally go into the next smaller grade if all their stock was calipered according to the recognized standard. We grade for mail orders according to caliper as well as height, as shown in our quotations for the various kinds of fruit trees. **It is the caliper that counts,** therefore be sure you are comparing trees of the same caliper as well as of the same height when you compare our prices with others.

It's the "Caliper" that Counts

Get Your Trees and Plants Direct from the Nursery Center of the World

A Young Spitzenburg Orchard.

Apples

The Apple has long been recognized as "Our National Fruit." Will thrive on nearly any well drained soil, and by careful selection of Summer, Autumn and Winter sorts a constant succession of fruit can easily be obtained. Even the poorest kind of an orchard will invariably net the owner more money per acre than any other crop which he raises, and the more care and attention given it the greater will be its productiveness. A good orchard will produce from \$500.00 to \$1000.00 worth of fruit a year per acre.

If the Apple trees are planted at the rate of 40 to 50 to the acre, and rows of Peach trees planted between the Apple trees each way, these will grow more quickly than the Apple trees and soon protect them from winds and thus prove a great benefit to them. And as the Peach trees in most cases come into bearing the second year, after eight or ten years of productiveness they can be cut out so as not to interfere with the growth of the Apple trees, at the same time having yielded the planter a large return for his outlay and labor.

Our Apple trees are generally three years from root, two years from bud, and are grown on the **Imported French Crab Whole Root Seedlings**. Our method of growing makes the cost of production double that of trees grown on American Seedlings, and for this reason our prices may be somewhat higher than others are quoting. However, we have found our manner of growing insures the finest root system to the trees, and we believe warrants the extra cost, for it produces the most vigorous, thrifty and hardwooded trees.

We give below a list of leading varieties, which have been well tested and can be recommended as among the best in cultivation.

Prices of Standard Apples and Crabs, all grown on Best Imported French Whole Root Seedlings:

	Each	10	100	1000	
XXX Extra, 5 to 7 ft., $1\frac{1}{16}$ inch and up in caliper.....	\$0.30	\$2.75	18 ¹⁰⁰	\$24.00	\$225.00
XX First Class, 5 to 6 ft., $\frac{5}{8}$ to $1\frac{1}{16}$ inch caliper.....	.22	2.00	15 ¹²	18.00	160.00
X Medium Size, 4 to 5 ft., $\frac{1}{2}$ to $\frac{5}{8}$ inch caliper.....	.20	1.75	12 ¹⁰	15.00	125.00

NOTE.—Some of the strong growing varieties, such as Baldwin, Greening, Northern Spy, etc., will run 6 to 7 feet in the Extra Large grade, other kinds slower growing average 5 to 7 feet.

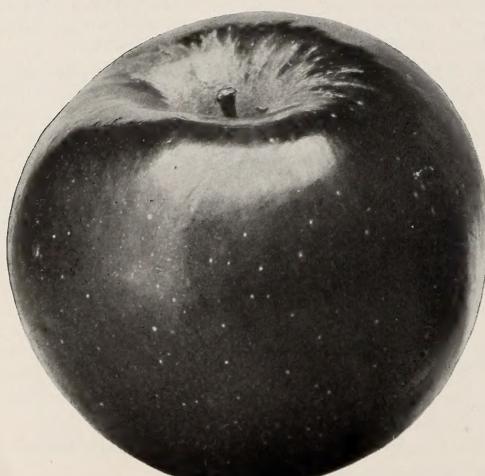

Summer Apples

Astrachan, Red. Large, roundish; nearly covered with deep crimson, overspread with a thick bloom; juicy, rich, acid, beautiful. The tree is a vigorous grower, with large foliage and a good bearer. August.

Early Harvest. Medium to large; pale yellow; fine flavor. Tree a moderate, erect grower, and a good bearer; a beautiful and excellent variety for both orchard and garden. Middle to end of August.

Sweet Bough. Large, pale green; flesh sweet, with rich flavor. July and August.

Yellow Transparent. A Russian variety. Tree an upright grower and a very early and abundant bearer. Fruit of good size; skin clear white, turning to a pale yellow; flavor acid and very good. Ripens from ten days to two weeks earlier than Early Harvest.

McIntosh Red.

Autumn Apples

Alexander. A very large and beautiful deep crimson Apple, with pleasantly flavored yellowish white flesh. Very hardy. September and October.

Duchess of Oldenburg. Of Russian origin; large size, roundish, streaked with red and yellow; flesh whitish; juicy; flavor is slightly subacid; tree a vigorous grower, very hardy; very early and abundant bearer. While it is indispensable in the North, it is almost equally so in the South. September.

Fameuse (Snow Apple). One of our finest dessert fruits. Of medium size, smooth, regular, deep crimson, with snowy white, tender, melting flesh of delightful flavor. The tree is vigorous and hardy, succeeding especially well in the North.

Fall Pippin. Very large; yellow, tender, juicy and rich. Tree vigorous. October to December.

Gravenstein. Large; greenish yellow to orange yellow, with stripes of light and dark red; flesh yellowish, firm, moderately fine, crisp, moderately tender, juicy, sub-acid, aromatic; very good to best. Late September to early November.

Maiden Blush. Medium to large; pale, waxen yellow with crimson blush; flesh moderately crisp, tender, very juicy, sub-acid; good especially for culinary uses. September to December.

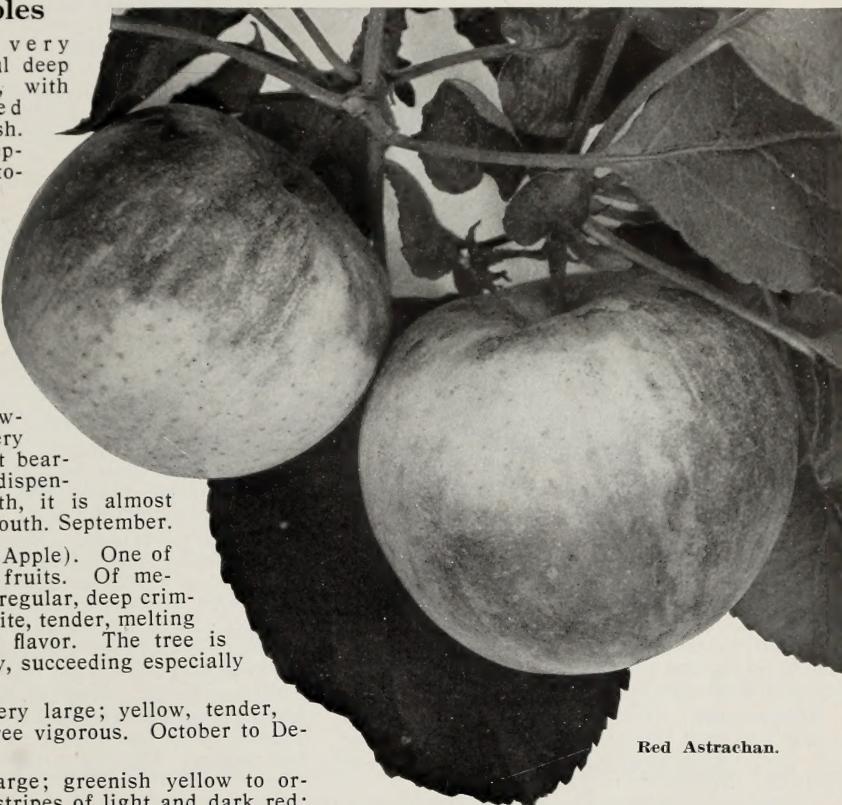

Rambo. Medium; yellowish, streaked with dull red and somewhat dotted; mild, tender and good. Fine grower, productive. October to December.

Winter Apples

Arkansas (Mammoth Black Twig). An Arkansas Apple resembling the Wine Sap, only larger; medium size, dark red, flesh yellow, firm and crisp, sub-acid; very productive. Recommended as a long keeping market Apple for the Middle, Southern and Western States.

Baldwin. Large, roundish, skin deep red; flesh juicy, crisp, sub-acid, good flavor. Very vigorous and productive. The best all round winter apple for New England and the Northern States. Keeps splendidly. December to March.

Ben Davis. The great market apple of the West and South, largely planted also in the East. One of the best for profit. Very early bearer and yields an immense crop of large, sub-acid, bright red, fine shaped fruit. The apple is of poor quality, but its attractive color, size and shape make it sell. It is a splendid keeper and fine for cooking. December to April.

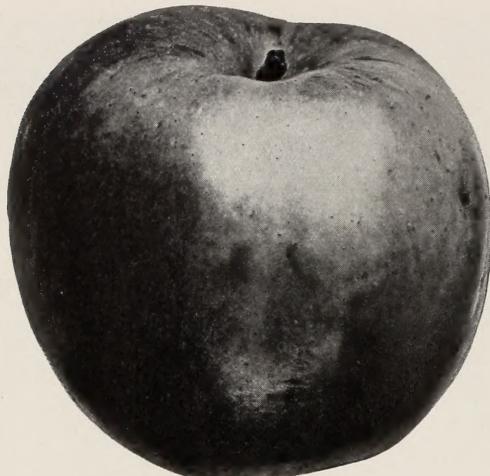

Red Astrachan.

Bismarck. An apple highly prized for its wonderful productiveness and early bearing. Color deep yellow, shaded with red; size very large, flesh yellow, tender and juicy; fair quality; excellent for cooking. Season early winter. It often fruits at two years old. We have the Bismarck Apple in bearing on our home grounds, and trees that have been set eight years have borne continuously for the past five years. The trees have averaged $1\frac{1}{2}$ barrels for the past three years.

Delicious. Large, with surface almost covered with a most beautiful, brilliant dark red, blending to golden yellow at the blossom end. In quality it is unsurpassed. In flavor it is sweet, slightly touched with acid, but only enough to make it all the more pleasing, with an aroma delightfully fragrant. Flesh fine grained, crisp, juicy, melting, and withal delicious. In keeping qualities it ranks with the best, coming out of storage in March and April in perfect condition. One of the strongest, hardiest, most vigorous growers among apples.

Gano. Form conical, good size and smooth; deep red, shaded on sunny side to mahogany; very attractive; flesh pale yellow, fine grained, tender, pleasant, mild, sub-acid; is a good shipper and keeper. Tree healthy, vigorous and hardy. An annual and prolific bearer. February to May.

Golden Russet. Of medium size, round-ovate; clear golden russet, with slight blush; tender, crisp, juicy and high-flavored. Tree robust and hardy; bearing large crops. November to April.

Baldwin.

WINTER APPLES—Continued.

Grimes Golden. Undoubtedly the most popular golden apple, commands highest market prices. Golden, transparent, yellow, ideal in quality. Tree hardy, a splendid filler. One of the most profitable varieties for Pennsylvania and Virginia and extensively planted in Western and Southern states.

Hubbardston (Nonesuch). Large, striped yellow and red; tender, juicy and fine. One of the best. Excellent for commercial orchard planting. November to January.

Jonathan. Fruit medium roundish; skin yellow, nearly covered with dark or lively red; fine grained, very tender apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. October and November.

King of Tomkins County. A superb red Apple of extraordinary size and fair quality; the flesh is slightly coarse, but tender and vinous. An abundant annual bearer. November to March.

McIntosh Red. A hardy Canadian variety, of the Fameuse class. Medium size, dark red, flesh white, very tender, splendid quality, especially desirable for fancy trade. An early and prolific bearer. Grown extensively in New York, Michigan, Colorado, Virginia, and the New England states.

Northern Spy. Too well known to need description. Crisp, tender, high quality, fine shaped, beautiful coloring. Red, usually striped, sub-acid. Takes 12 to 15 years to come into bearing, but very productive after that. November to March.

Northwestern Greening. Very hardy, greenish-yellow, large, mild, sub-acid. Tree a strong, vigorous grower, and one of the best for top-grafting. November to March.

Paragon. Large to very large; deep red; tender, yet firm; one of the handsomest apples grown; quality extra good. Tree hardy, vigorous, very productive. Season December to May.

R. I. Greening. Large; greenish-yellow; flesh yellow, fine grained, tender, crisp, juicy, sub-acid. Fine for cooking. Very productive. November to March.

Rome Beauty. A large and handsome apple, almost entirely covered with bright red; of high quality. The flesh is tender, juicy and highly flavored. It is a popular apple over a wide range of country, particularly in the West. December to March.

Spitzenburg (Esopus). Medium, dull red; flesh yellow, firm, juicy, delicious, sub-acid. November to March.

Sutton Beauty. A leading market Apple in Massachusetts, where it originated, in western New York, and in some other sections. Medium to large, roundish, waxy yellow, with brilliant blush of red; tender, juicy, sub-acid, of good flavor and good keeping quality. The tree grows and produces freely. November to April.

Stark. Large, roundish, golden green, shaded with dark and light red; flesh yellowish, juicy, mild, sub-acid. Early and annual bearer and a valuable commercial sort. January to May.

Stayman's Winesap. One of the finest apples in cultivation, now attracting attention everywhere as a profitable market variety. It has size, color, productiveness and quality to commend it. Tree vigorous, irregular and drooping in habit, and adapts itself readily to varying soils and situations. Truly a great apple.

Talman Sweet. Medium, pale whitish-yellow; flesh white, fine grained; very hardy and productive. The best winter sweet apple for home and market. November to March.

May 1st, 1912.
Trees arrived yesterday all in good order. Am well pleased with the stock.

A. R. KNOWLTON, Saratoga County, N. Y.

May 16th, 1912.
Received the trees and small fruit collection in fine shape and all starting off to grow.
MRS. G. F. Eels, Columbiana County, Ohio.

Rome Beauty.

ROCHESTER, NEW YORK

WINTER APPLES— Continued.

Twenty Ounce. Very large, yellow and red, tender, juicy, crisp, sub-acid; productive. October to January.

Wagener. Medium, yellow shaded with crimson; very tender; juicy, crisp, early bearer, mild acid, fine flavor. Very productive and a fine apple. November to February.

Wealthy. An American apple that is becoming very popular on account of its handsome appearance and early fruiting. Hardy, productive. Fruit large size, roundish, skin smooth, splashed with dark red; flesh white, tender, juicy, and sub-acid. November to January.

Winter Banana. An excellent new apple of large size, very showy in appearance, roundish, deep yellow with red cheek. In season in November and keeps well till spring. Is a handsome apple and has a Banana perfume; tender and delicious.

We pay freight on orders \$5.00 or over East of Mississippi.

One Acre Apple Orchard for \$6.00.

Fifty fine trees, best and most profitable varieties, orchard planting size, 4 to 5 feet. 10 Baldwin, 10 Wealthy, 10 Gano, 10 Winter Banana, 10 Stayman's Winesap. Set 30 feet apart each way, **\$6.00** enough for one acre

Garden Collection Apple Trees.

1 Yellow Transparent, 1 Bismarck, 1 Delicious, 1 McIntosh Red, 1 Talman Sweet, 1 Northern Spy. 6 first class 2-yr. trees, 5 to 6 ft. **\$1.18**

Wolf River. Tree very hardy and productive; fruit large and handsome, red color, flesh white and exceedingly fine quality; sub-acid.

York Imperial (Johnson's Fine Winter). Medium, whitish shaded crimson; firm, crisp, juicy, mild, sub-acid. Very popular in Pennsylvania and the middle South. November to February.

Crab Apples

Hyslop. Large, dark rich red, flesh yellow, sub-acid; productive, hardy and popular. October.

Martha. One of the largest and finest crabs; red and yellow. Fine for sauce. October.

Transcendent. Large, yellow with rich crimson cheek. An improved Siberian crab. Sept.

Whitney. Large, greenish striped with carmine; flesh firm, juicy and rich. Season last of August.

See price of Apples.

L.W.HALL & CO.

A view of one of our Two-year Apple Blocks; pronounced one of the finest in Western New York.

A.B.M.CO.

Bartlett.

Standard Pears

They thrive best on a strong loam with clay subsoil, but will succeed in any garden soil. Our blocks this year are the largest and as fine as any we have ever grown. Trees are all budded on imported French Whole Roots, which insures finest root system.

Price of Standard Pears:

XXX Extra—5 to 7 ft., $\frac{11}{16}$ in. and up in caliper: 25c each, \$2.25 per 10, \$20.00 per 100, \$175.00 per 1000.

XX First Class—5 to 6 ft., $\frac{5}{8}$ to $\frac{11}{16}$ in. in caliper: 20c each, \$1.75 per 10, \$15.00 per 100, \$125.00 per 1000.

X Medium Size—4 to 5 ft., $\frac{1}{2}$ to $\frac{5}{8}$ in. in caliper: 15c each, \$1.25 per 10, \$11.00 per 100, \$100.00 per 1000.

Summer Pears

Bartlett. Large; yellow, tinged with red; buttery and melting, with a rich, musky flavor. Bears young and abundantly. Tree vigorous and erect grower; excellent for garden or commercial orchard planting. Is the leader among canning pears, and when well grown is a universal favorite and commands top prices. Will begin to bear in three years, and in about seven years will produce a bushel of fruit per tree. Season, September.

Clapp's Favorite. Very large and showy, golden yellow with red cheek; very productive. Ripens a week before Bartlett. August.

Koonee. Fruit large, yellow with crimson cheek; quality good, spicy, juicy, sweet; very early.

Wilder. Medium in size, yellow with carmine shading; fine grained, tender, sub-acid. August.

Autumn and Winter Pears

Beurre d'Anjou. A large greenish Pear, shaded with russet-crimson; the flesh is high-flavored, rich and vinous; the tree very productive, either as dwarf or standard. For late fall and very early winter use, we have no better variety. October to January.

Clairgeau. The fine size and exceeding beauty of this pear render it most valuable for market. The smooth yellow skin is shaded with orange and scarlet; the flesh is yellow, juicy, aromatic, and somewhat granular. The tree bears early and abundantly. October and November.

Duchess d'Angouleme. Large, greenish-yellow; tender, melting, buttery, juicy. Best as dwarf.

Flemish Beauty. Large, beautiful, juicy, melting, rich and fine. Strong grower and good bearer; hardy everywhere. September and October.

Standard Pear Collection No. 1.

1 Bartlett, 1 Clapp's Favorite, 1 Kieffer, 1 Flemish Beauty, 1 Seckel, 1 Anjou. All fine, strong, 2 year trees. 5 to 6 feet. Six extra fine Pear, best varieties for **98c**

Standard Pear Collection No. 2.

10 Bartlett, 10 Kieffer, 10 Clapp's Favorite. Best varieties for canning and commercial purposes. First class 2-year stock, 5 to 6 feet, only **\$4.50**

ROCHESTER, NEW YORK

AUTUMN AND WINTER PEARS—Continued.

Garber. Large, bright yellow with red; juicy and good; a splendid canning pear; tree vigorous and hardy, not subject to blight; ripens just after Bartlett.

Howell. One of the finest fall pears; large, yellow, rich. Splendid quality. September.

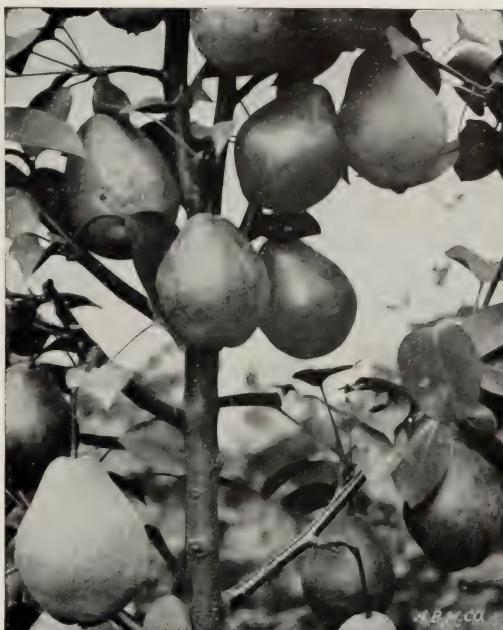

Kieffer. Very large when thinned, bell shaped; golden yellow when fully ripe; sometimes has a light blush; flesh white, crisp, juicy, of fair quality, exceedingly valuable for cooking and canning, which brings out its best spicy flavor. The tree is a vigorous grower, a wonderfully abundant and regular bearer. It has been perhaps the most profitable pear grown. The Kieffer pear can be grown cheaper than potatoes on account of its prolific qualities. October to December.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter pear. The tree is hardy, healthy and productive, bearing large crops annually. November and December.

Rossney. This new pear combines excellent flesh and flavor, large size, bright color, and smooth, regular form with very superior shipping qualities. Two-year grafts have given us remarkably fine specimens of its fruit, which ripens about two weeks later than Bartlett and averages larger. The tree is vigorous, hardy in wood and in fruit-buds, and a great bearer. September.

Seckel. Small, finest flavor; excellent for pickling and dessert; very productive. September.

Sheldon. Medium size, round, russet and red; melting, rich, very juicy, delicious. Fine for dessert; very productive; keeps well. October.

Kieffer.

Worden-Seckel. A seedling of the Seckel; color golden-yellow with bright crimson cheek; flesh white, juicy, buttery, fine grained and melting; tree an upright, vigorous grower. Very hardy and an abundant bearer.

Dwarf Pear Trees on Quince Roots

Price of Dwarf Pears, budded on Best Imported French Whole Roots.

	Each	10	100	1000
XXX Extra—3 to 4 ft., $\frac{11}{16}$ in. and up in caliper.....	\$0.25	\$2.00	\$15.00	\$125.00
XX First Class—2 to 3 ft., $\frac{5}{8}$ to $\frac{11}{16}$ in. in caliper20	1.50	12.00	100.00

The dwarf varieties require less than one-fifth the space necessary for the standard varieties, and though the tree is dwarf the fruit is same size as standard, and is borne in large quantities. It is valuable both for the home

garden and orchard planting for commercial purposes. It is a good filler for Apple or Standard Pear orchards, because it is an early bearer and takes up but a small space. Trees should be planted ten feet apart. We can furnish the following varieties in Dwarf (for description see Standard Pears):

Bartlett, Beurre d'Anjou, Clapp's Favorite; Duchess d'Angouleme, Flemish Beauty, Lawrence, Seckel.

May 6th, 1912.

I received the trees all right and they were better than I expected, splendid trees and shipped in fine condition, better than trees I gave \$9.00 a dozen for. Please send Fall catalogue, as I want more trees.

E. P. WRENN,
Alexandria County, Va.

(Refers to our 94c collection advertised last spring.)

Seckel

Cherries

Cherry growing for profit is a phase of orcharding which offers a splendid opportunity and attracts more attention each year. No fruit outside of apples generally does so well. Sandy or gravelly soil is best, but trees will thrive in any situation except a wet one. Trees begin to bear very young and a good bearing orchard from 7 to 10 years old will bring \$300.00 to \$500.00 per acre each year.

Best Varieties for Eastern States: Sour—Early Richmond, Dyehouse and Montmorency; Sweet—Black Tartarian, Napoleon and Windsor.

Best Varieties for Western States: Sour—English Morello and Wragg. Sweet—Napoleon or Royal Ann, Lambert and Bing.

We have over 70,000 trees in our blocks this season, the finest and largest we have ever grown, all budded on the best imported French Roots. Plant from 15 to 18 feet apart each way.

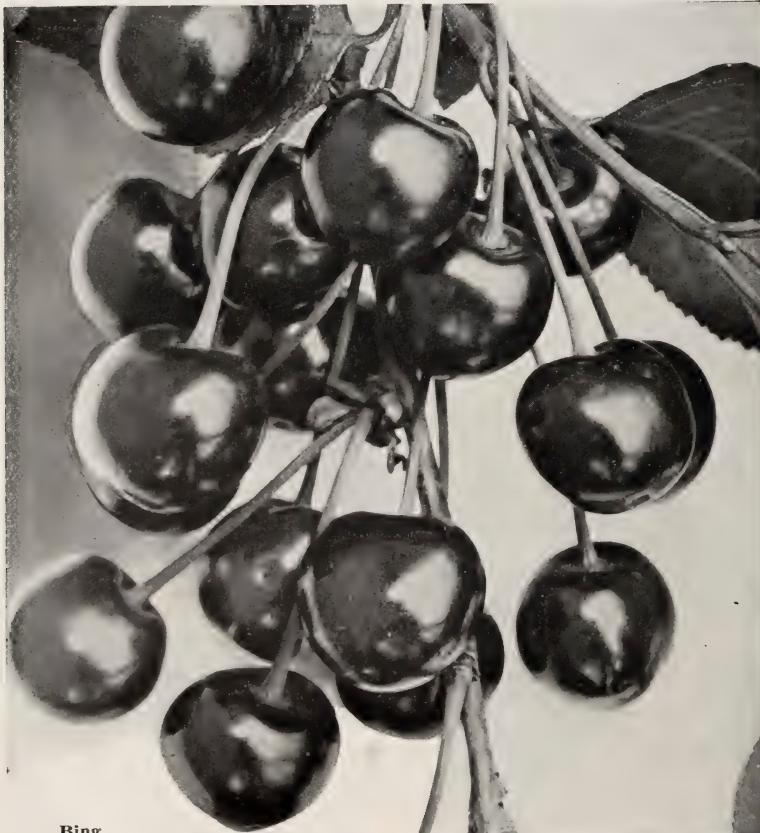

Price of Cherries:

	Each	10	100	1000
XXX Extra—6 to 7 ft., $\frac{3}{4}$ in. and up in caliper (sweet)	\$0.25	\$2.25	\$20.00	\$175.00

XX First Class—5 to 6 ft., $\frac{5}{8}$ to $\frac{3}{4}$ in. in caliper (sweet)20	1.75	15.00	135.00
XX First Class—4 to 5 ft., $\frac{5}{8}$ to $\frac{3}{4}$ in. in caliper (sour)20	1.75	15.00	135.00
X Medium Grade—4 to 5 ft., $\frac{1}{2}$ to $\frac{5}{8}$ in. in caliper (sweet)15	1.25	10.00	85.00
X Medium Grade—3 to 4 ft., $\frac{1}{2}$ to $\frac{5}{8}$ in. in caliper (sour)15	1.25	10.00	85.00

Hearts and Bigarreaus (Sweet)

Black Tartarian. This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Bing. A new black cherry; originated in Oregon; size large, color blackish-purple; flesh very solid and of the highest flavor; tree vigorous, upright, hardy and productive; a fine shipping and market cherry.

Governor Wood. Very large, rich; light yellow with red cheek; juicy and sweet. One of the very best. Late in June.

Lambert. One of the largest of all; heart shaped, dark purplish red, turning to almost jet black when fully ripe. Flesh firm, solid, rich and juicy, with sprightly flavor; seed very small for so large a fruit. Tree rugged, strong grower, hardy, enormous bearer. Late July.

Napoleon. Of fine appearance and the very largest size; yellow and amber, with bright red blush; flesh firm, juicy, delicious. Profitable for market; finds a ready sale both for canning and dessert. Forms a grand tree. July.

Schmidt's Bigarreau. Heavily clustered fruits of largest size, deep crimson-black; tender, juicy, well-flavored. July.

Windsor. A splendid, large, liver-colored cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish. Large, pale yellow, with light red cheek; firm and delicious. Ripens latter part of June.

Dukes and Morellos (Sour)

Baldwin. Tree upright, vigorous grower, forming round head; leaves large, broad; fruit large, almost round, very dark transparent wine color; flavor slightly acid, yet the sweetest and richest of the Morello type; unexcelled in earliness, vigor, hardiness, quality and productiveness.

ROCHESTER, NEW YORK

CHERRIES—Continued.

Dyehouse. A hardy and valuable cherry. Unquestionably the earliest cherry, ten days earlier than Richmond, fine quality, its early bearing remarkable as its great hardiness. Often bears at two years old, and has the appearance of being covered with a scarlet cloth, such is the abundance of the fruit. Has smallest pit of any cherry known; splendid keeper, free from knots. For tarts, pies, and—especially for canning, it has no superior among cherries. June.

Early Richmond. Medium size, dark red, melting and juicy, acid flavor; one of the most valuable and popular of the acid cherries and is unsurpassed for cooking; tree slender grower, exceedingly productive and very hardy; will stand the most severe weather.

English Morello. Medium to large, roundish; dark red, nearly black when ripe; flesh purplish-red, meaty, juicy, slightly astringent and good; very productive. August.

Montmorency. A large red acid cherry; larger than Early Richmond, and fully ten days later; very profitable; more largely planted for market than any other. Late June. The tree is hardy, of vigorous growth, exceedingly productive and the greatest money maker in the list.

Montmorency.

Wragg. Similar to English Morello, but said to be much hardier in tree. Valuable variety that originated in the West and has proved extremely productive and satisfactory wherever grown. July.

See our Special Bargain Collections.

Plums

Price of Plums and Prunes:

	Each	10	100	1000
XXX Extra—6 to 7 ft., $\frac{3}{4}$ in. and up in caliper.....	\$0.25	\$2.25	\$20.00	\$180.00
XX First Class—5 to 6 ft., $\frac{5}{8}$ to $\frac{3}{4}$ in. in caliper.....	.20	1.75	15.00	140.00
X Medium Grade—4 to 5 ft., $\frac{1}{2}$ to $\frac{5}{8}$ in. in caliper18	1.50	12.00	100.00

The ability of the Plum to adapt itself to various conditions of soil and climate makes it one of our most valuable fruits. When properly grown and well ripened on the tree the Plum is one of the most delicious fruits. As a dessert fruit and for eating out of hand it is second only to the peach, and for canning it has only one superior, the peach. For making jelly it competes with the currant for first place. Every farm should have an orchard of selected plum trees. Would advise planting plum trees in the poultry yards on all farms, as the poultry will eat up most of the curculios. Plum trees and

poultry make an excellent combination both for profit and pleasure. Good plums find a ready sale in any market where choice fruit is appreciated. We have about 50,000 trees, all grown on the

Finen Imported French Whole Roots, and they made an exceptionally strong growth this past summer. Our block of Plums and Prunes is considered one of the best in this large nursery section.

Beauty of Naples. Medium size, greenish-yellow, very sweet, excellent flavor, thin skinned, hardy. Fine for dessert. September.

Bradshaw. Very large, purple, juicy, of excellent quality. Tree is erect and vigorous; productive. Aug.

German
Prunes.

Burbank.

PLUMS—Continued.

Fellemburg (Italian Prune). Very large, rich dark purple, flesh juicy and good, rather coarse, freestone; tree spreading; productive. September.

German Prune. Medium size, dark blue, juicy, rich. Tree upright, vigorous and productive. September.

Giant Prune, or York State Prune. Very large, measuring $2\frac{1}{2}$ inches long and 2 inches in diameter; reddish purple, flesh yellow, sweet and firm, rich, delicious, freestone; an excellent shipper. Tree fairly vigorous and productive. September.

Grand Duke. Very large, deep purple, fine flavor; entirely free from rot. Last of September.

Green Gage. Small, delicious, very prolific; fine for table use. August.

Gui. Very large, deep purple, flesh yellowish, sweet; early and prolific bearer; hardy. September.

Lombard. Medium, violet red, juicy, pleasant and good. Immensely productive, hardy. August.

Monarch. Large, dark purple, freestone, delicious quality. Tree strong, upright and productive. Does not crack with rain. Season last of September.

Moore's Arctic. Medium, dark purple, thin skin; fine flavor; a great bearer, extremely hardy. September.

Reine Claude. Large, yellowish green, juicy, melting, sugary, rich flavor. September.

Shipper's Pride. Very large, dark purple, juicy, sweet, fine quality. Hardy and productive. September.

Shropshire Damson (or Prune Damson). An English variety of great merit for preserving. Large and much more desirable than the common Damson. Tree vigorous grower; very free from attacks of curculio; hardy and an abundant bearer. October.

Tatge. Evidently a seedling of the Lombard. Is larger, more nearly round, darker in color and finer quality than that well known and excellent variety. Claimed to be the hardiest, most productive and longest lived plum known.

Yellow Egg. Very large, golden yellow, fine quality; very productive. August.

Japanese Varieties

Abundance. Fruit large, showy and beautiful. Color amber, turning to a rich, bright, cherry red, highly perfumed. Flesh light yellow, juicy, tender and delicious, freestone. The tree is a strong, upright grower and immensely productive. Season early.

Burbank. Flesh yellow, firm, tender and very juicy, rich, sweet and aromatic. Blooms late, very productive. Tree spreading and hardy. One of the best. Medium.

October Purple. Originated by Burbank, who regards it as one of the best introduced. Fruits on the old wood and frequently measures seven inches in circumference. Flesh yellow; superb quality; stone small. Tree strong, erect grower, forming a shapely head.

Red June. Fruit medium to large, deep vermillion red, very showy, flesh light lemon yellow, slightly sub-acid; half cling, pit small. Tree hardy, upright and productive. Very early.

Wickson. Large, color carmine with a heavy white bloom; stone small; flesh fine, firm, sugary and delicious. Picked green will ripen and color perfectly and keep two weeks or more after ripening, making it an excellent market plum. Tree upright grower and productive.

ROCHESTER, NEW YORK

Elberta.

Peaches

Our Peach Trees are all budded on seedlings grown from natural Tennessee Peach Seed, which makes them healthy, vigorous and long lived, and are budded as far as possible from select bearing orchards.

Peaches should be planted about eighteen feet apart, and do best on a sandy loam. To secure healthy, vigorous and fruitful trees and fine fruit, the following points must be well attended to: First—Keep the ground clean and mellow. Second—Keep the heads low—the trunks should not exceed three feet in height. Third—Give them an occasional dressing with wood ashes. Fourth—Prune every spring, shortening the shoots of the previous year's growth; this keeps the head round, full and well furnished with bearing wood. Cut weak shoots back about one-half, and strong ones one-third; but see that there is left a sufficient supply of fruit buds. Young trees should be well mulched every spring, or kept well cultivated until the middle of July each year.

Price of Peaches:

	Each	10	100	1000
XXX Extra—5 to 6 ft., $\frac{1}{16}$ in. and up in caliper.....	\$0.20	\$1.50	\$12.00	\$100.00
XX First Class—4 to 5 ft., $\frac{1}{2}$ to $\frac{1}{16}$ in. in caliper.....	.15	1.20	9.00	70.00

Belle of Georgia. Very large, skin white with red cheek; flesh white, firm and of excellent flavor; the fruit is uniformly large and showy; very prolific bearer and fine shipper. Ripens with Crawford's Early.

Bokara. Large, yellow with red cheek; good quality and a fine shipper. August.

Beers' Smock. A large, yellow flesh peach, an improvement on Smock's Free, which it resembles. Ripens a few days later and is a better annual bearer. One of the most desirable and profitable market sorts. Last of September.

Carman. Large, oblong, pale yellow with deep blush; flesh tender, juicy and fine flavor; very hardy and a heavy bearer. August.

Chair's Choice. Large, deep yellow, red cheek; firm; a few days earlier than Smock.

Champion. A white freestone, ripening about September 1st. Delicious, sweet, rich and juicy; skin creamy white with red cheek; strikingly handsome. It is hardy, productive, early, largest size and highest flavor.

Elberta. Among peaches Elberta takes the lead for beauty, size and quality. It is one of the hardiest, as large or larger than Crawford's Early, and fully its equal in beauty and flavor. One of the finest yellow freestone peaches. Fruit yellow with red cheek; flesh yellow, juicy, and of good quality; ripens slightly later than Early Crawford.

Crawford's Early. Very large, yellow, rich, sweet, luscious; free. September.

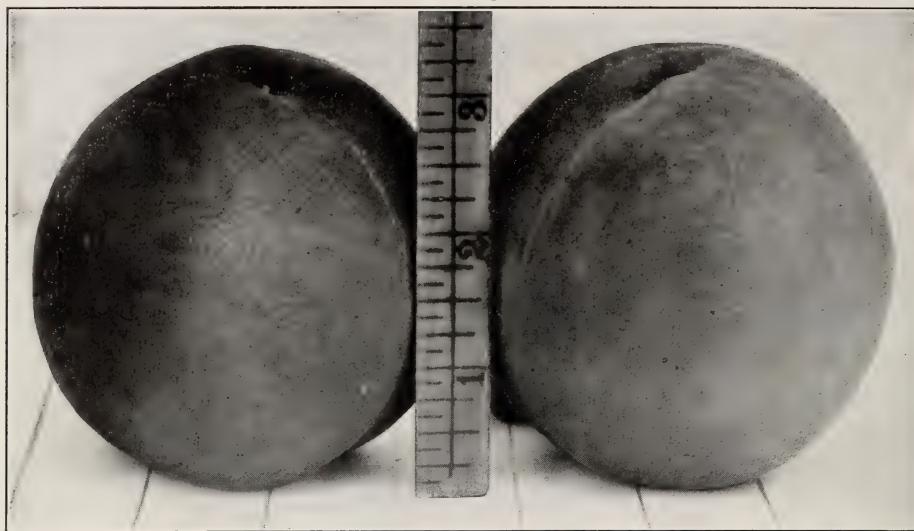

Crawford's Late. Very hardy; large, yellow, rich, sweet; free. September.

Crosby. A beautiful yellow freestone peach with very small pit. Excellent flavor, large size, color orange-yellow, with carmine on the sunny side. Very beautiful; tree of willowy growth, like Wager; rather dwarf; ripens between Early and Late Crawford.

Fitzgerald. A native seedling, as large or larger than Crawford; freestone, very best quality. A heavy bearer, fruiting very young, almost invariably the second year after planting. Very hardy. Fitzgerald ripens just after Crawford's Early.

Greensboro. Larger and earlier than Alexander, and is nearly freestone. It is colored beautifully with crimson and has a yellowish cast; the flesh is white and of good flavor. The peach is large, many specimens of this variety measuring 8 to 9 inches in circumference. Productive.

Triumph. It ripens with Alexander, blooms late, has large flowers; a sure and abundant bearer. The fruit is of large size, with a very small pit, and is indeed beautiful. Surface is yellow, nearly covered with red and dark crimson in the sun; flesh bright yellow, free when fully ripe and of excellent flavor.

Stearns.

PEACHES—Continued.

Lamonte. Magnificent large yellow peach of good quality; tree vigorous and productive. Its fine size, beauty and productiveness make it one of the most desirable sorts. Entirely free from fungus disease. 20c each, \$2.00 per doz.; \$15.00 per 100.

Mountain Rose. Large, red; flesh white, juicy, rich and excellent. One of the best early peaches, ripening with Troth's Early, and much finer and larger than that variety. Should be in every collection. First of August.

Niagara. In appearance just like Elberta and of same size. However, it is a much better peach in quality, much less subject to leaf curl and other diseases, hardier and about a week later. Planted more than all others in the famous Niagara peach belt.

Salway. Very large, yellow, firm, juicy, melting, rich; very late, ripening in October; free.

Wheatland. Extra large size, handsome golden color; ripens between Early and Late Crawford; excellent quality; very firm and bears shipment well; freestone.

Wonderful. Large, rich golden yellow; flesh yellow, rich, highly flavored; free. September.

Yellow St. John. Large, roundish, orange-yellow, with deep red cheek; juicy, sweet and high flavored; flesh yellow, prolific; an excellent peach. Season middle of June.

Stearns. Originated by Mr. Jas. N. Stearns, one of the oldest and best peach growers in western Michigan. The following is what Mr. Stearns says of this new variety: "The handsomest peach I ever saw because of its form, size and brilliancy of color; its excellent flavor, firmness and good shipping qualities are unsurpassed. I shipped a couple of bushels to North Dakota; they wrote me every peach arrived just as fine as when picked from the tree. In size equal to the Elberta, if properly thinned; much superior to this sort in quality, beauty, and more than four times as hardy; I get four good crops from this where I get one from the Elberta, planted side by side. Tree is a strong, upright, very hardy and free from the disease so fatal to the Elberta—curl-leaf. Brilliant red on surface, with yellow flesh, perfectly free, small pit." XXX....25c each, \$2.25 per 10, \$20.00 per 100 XX....20c each, \$1.75 per 10, \$15.00 per 100

Quinces

The quince is attracting a good deal of attention as a market fruit. The tree is hardy and compact in growth and requires little space; is productive, gives regular crops and comes into bearing early; the fruit is much sought for canning. It will grow in any good garden soil, which should be kept mellow, and well enriched. Fruit should be thinned out if it bears too freely.

Price, budded on Best Imported French Whole Root:	Each	10	100	1000
XXX Extra—4 to 5 ft., $\frac{5}{8}$ in. and up in caliper.....	\$0.25	\$2.25	\$22.00	\$200.00
XX First Class—3 to 4 ft., $\frac{1}{2}$ to $\frac{5}{8}$ in. in caliper.....	.20	1.75	15.00	125.00

Bourgeat. A French variety. Very productive, healthy and thrifty. It grows in tree form, like pears or plums. It has almost perfect foliage, leaves green and fresh unto the end of the season. The fruit is very large, smooth, golden yellow, of the best quality, tender; ripens just after the Orange, and will keep past midwinter in perfect condition.

Champion. Very large size, rich golden yellow when ripe; great bearer; very late. November.

Meech's Prolific. Fruit bright yellow; flesh very fragrant and tender, unsurpassed. October.

Orange. Very large, bright golden yellow, fine quality; flesh firm, cooks tender. October.

Rea's Mammoth. Very large, bright golden yellow. Ripens very early; very prolific. October.

Note our Special Collection Offers

ROCHESTER, NEW YORK

Apricots

Apricots are a rich, delicious fruit, coming between cherries and peaches. Very much like the peach in outward appearance, but like the plum in quality and texture. One of the finest fruits for drying, and they fill a season when there are no other large fruits.

Price of Apricots:

XXX Extra—3 to 4 feet, 5/8 in. and up in caliper.....	Each 10
---	--------------

	\$0.25 \$2.00
--	------------------

Aeme. A new and fine variety. Tree stout, healthy and hardy; handsome foliage. Fruit large and sweet; rich yellow with red cheek. July.

Harris. Rich golden yellow; large size, very fine quality; hardy, early bearer and prolific.

Montgamet. Medium size; early; juicy and excellent; hardy. July.

Moorpark. Large; orange and red; firm and juicy, with rich flavor; very productive. August.

Nut Trees

The constant and growing demand for nuts, and the immense quantities of them yearly imported to meet it have given a great impetus to the planting of nut-bearing trees. So palatable and wholesome are the nut kernels that they should become a staple article of food here, as in Europe. The returns from established nut-bearing orchards, as well as numerous experiments, show plainly how successful nut culture may be made in America. Most farms contain land that would pay better planted in nut-bearing trees than in anything else; the nuts, in many cases, paying better than farm crops or fruits, while the trees are growing into valuable timber.

Price of Nut Trees (except where otherwise noted), 50c each, \$5.00 per dozen.

Chestnuts

American Sweet Chestnut is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes. As high as \$14.00 per bushel has been paid for American Sweet Chestnuts when first brought into New York market. \$6.00 to \$10.00 per bushel is the common price. 4 to 5 ft., 50c each, 10 for \$4.50.

Paragon (Japanese). Nuts are of superior flavor and sweetness. It comes into bearing at three to four years of age. Very productive.

Hickory Nuts

Shellbark. A peculiar, rich native nut, in flavor excelled by none. 75c each, \$8.00 per doz.

Walnuts

Butternut. A native tree, valuable for timber, and bearing an oblong, thick-shelled nut of delicious flavor.

Black. A native tree of large size and majestic form. The most valuable of all trees for its timber; rapid grower, producing a large, round nut of excellent quality.

English. It produces immense crops of thin-shelled, delicious nuts.

American Sweet Chestnut.

Fruit in green state is highly esteemed for pickling.

Japan (Sieboldi). Perfectly hardy, rapid-growing, handsome form, immense fern-like leaves, making one of the finest ornamental trees; bears young and abundantly. Nuts produced in clusters and resemble butternuts in shape and quality, but somewhat smaller and with thinner and smoother shell. Worthy of extensive planting.

A One-Half Acre Sour Cherry Orchard, \$11.48.

50 Montmorency, 25 English Morello, 25 Early Richmond. Plant these 15 feet apart each way. One hundred of the greatest money making varieties, 2 year, 4 to 5 feet, fine roots, only \$11.48

Peach Collection No. 1

2 Belle Georgia, 2 Niagara, 2 La Monte, 2 Elberta, 2 Early Crawford. Ten extra fine 4 to 5 foot trees, worth \$2.00, for only 98c

Wilkesbarre, Pa., Nov. 8th, 1912.

* * * Two years ago I paid \$7.00 for an assortment of Fruit Trees from another nursery, and one apple tree is now living. Last Spring I paid you \$1.00 for an assortment of 12 Fruit Trees and every one grew and thrived.

E. I. MACK.

L. W. HALL & COMPANY

Small Fruits

Small fruit growing can be begun on a small area and with little capital. They bring quick returns, for it takes most small fruits only a little over a year to bear a crop. They can be profitably grown in connection with orcharding, as for the first few years small fruits may be grown between the rows of trees and not damage the trees at all, but rather benefit them by the better cultivation, and while the owner is growing his orchard he is being amply repaid for the use of the land and for his labor with the proceeds from his small fruits.

Strawberries are probably the most important of the small fruits, as they give a larger income per acre than any, averaging \$300.00 Net Profit per acre. Set 12 inches apart in rows 4 feet apart. Cultivate often through growing season, and keep out all weeds. Mulch with straw in the fall.

Raspberries and **blackberries** are easy to grow and profits are large. The fruit is always in demand, bringing 8 to 15 cents per quart. Set in hills 3 feet apart in rows 6 feet apart. Keep the ground light, rich and clean.

Currants and **Gooseberries** yield 200 bushels and over per acre and bring at a low average \$4.00 to \$5.00 per bushel. The expense of cultivation is light and returns cannot help but be satisfactory. Set in rows 4 feet apart each way and cultivate frequently so as to give good soil mulch during growing season.

Strawberries

Price of Strawberries (if by mail add 25c per 100) 25 100 1000 10000
..... \$0.50 \$1.00 \$5.00 \$40.00

Brandywine. Berries very large, regular, conical form; color bright glossy red; flesh firm and of very excellent quality. Its very large size, beauty of form and color, firmness and high quality will make it a desirable variety for any purpose.

Bismarck. Plant resembles Bubach, but more robust and stocky, with the same ironclad foliage. Fruit produced in abundance, out-yielding Bubach. Shape obtuse, conical, never coxcombed; the heaviest, most solid berry ever grown or handled. Color bright scarlet, no green tips, very firm, good flavor; season medium to very late, size larger than Bubach. Perfect blossom. Give it good strong soil and be surprised and pleased with its immense crop of large, luscious berries. **60c per 25, \$1.50 per 100, \$8.00 per 1000.**

Gandy. A very strong growing plant; moderately productive; fruit large, uniform shape, bright color and good quality; season late. This variety is a cross between Jersey Queen and Glendale. Ripens two weeks after the Sharpless.

Clyde. A new berry that is making a record wherever grown. Season early to medium. Perfect flower, berries large to medium, very firm, dark scarlet in color, fine flavor.

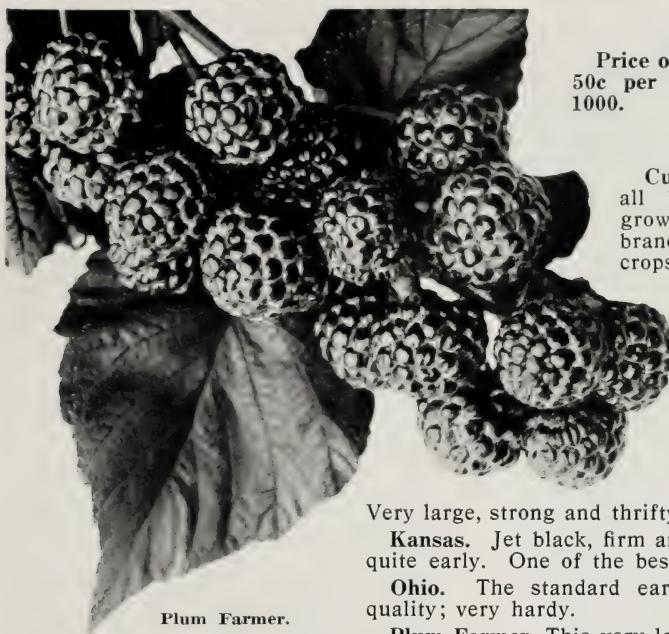

William Belt. Berries large, conical, rather long, regular in outline; bright red, glossy; quality good, moderately firm. Plant vigorous, healthy and quite prolific.

Glen Mary. Berries large, bright deep red, rich, sweet and good. One of the most productive and holds its size well to the end. Medium to late. Its leaves are of a rich, dark green. In ordinary field culture, alongside of Warfield, Bubach, Haverland, Greenville, etc., it has proved itself a better berry in every way. Fruit large, somewhat irregular but not coxcombed; dark red clear through, sometimes with white tips, retaining its color when canned. Very best quality, rich, firm and abundantly productive. A fine keeper and shipping berry.

Senator Dunlap. Season early to medium; popular market sort. It withstands all conditions of weather beyond the average. Very productive; dark red all through.

Bismarck.

Plum Farmer.

Raspberries

Price of Raspberries (except where noted):
50c per dozen, \$1.50 per 100, \$12.00 per
1000.

Blackcaps

Cumberland (Black). The largest of all black caps; a healthy, vigorous grower, throwing up stout, stocky, well branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality about the same as Gregg; keeps and ships as well as any of the blacks. The most profitable market variety.

Black Diamond. A large, hand-some berry of great productiveness and splendid keeping and evaporating qualities; sweet; excellent.

Gregg. The standard late sort. Very large, strong and thrifty. Hardy and good yielder.

Kansas. Jet black, firm and delicious; as large as the Gregg, quite early. One of the best.

Ohio. The standard early berry. Very productive. Fine quality; very hardy.

Plum Farmer. This very large and productive black raspberry has been thoroughly tested in western New York, where it is a great favorite for market or home use. It is covered with a grayish bloom, like the bloom on a grape. It ripens very early and quickly. The fruit is enormously large. It sells at highest price. \$2.00 per 100, \$15.00 per 1000.

Red Varieties

Columbian. The Columbian is a seedling of the Cuthbert, grown near the Gregg Blackcap Raspberry, and believed to be a cross between the two. Of the Schaffer type, but hardy even in Wisconsin. It is a most vigorous grower, canes 10 to 16 feet in length and often over an inch in diameter; fruit very large; color dark red bordering on purple; adheres firmly to the stem; seeds small; has a distinct flavor of its own, making it a most delicious table berry. For canning purposes it is much superior to any other.

Cuthbert, or Queen of the Market. A remarkably strong, hardy variety; stands the northern winter and southern summers equal to any. Berries very large, measuring three inches around, conical, rich crimson, very handsome, and so firm they can be shipped hundreds of miles by rail in good condition; flavor is sweet, rich and luscious. The leading market variety for main crop.

Herbert. A Canadian seedling. Has been tested at N. Y. Experiment Station and by many large growers, all giving it very favorable reports. In hardiness it easily takes first place. The cane is very strong and vigorous, leaves large and healthy, and has never been affected by anthracnose or disease of any kind. Fruit bright red, somewhat oblong, the largest of all red raspberries. Flavor very sweet and juicy, the very best for table use. Enormously productive, will bear twice the crop of either Cuthbert or Loudon, under the same conditions. Holds its size well to the end of the season. 3 for 25c, 12 for 75c, 100 for \$3.50.

Loudon. The best all-around market red raspberry. It is a wonder in productiveness; bright color, perfectly firm, and of the largest size. It is pronounced by E. S. Carman, of "The Rural New Yorker," as the best red raspberry. The canes are strong, vigorous and hardy.

\$2.40.

RASPBERRIES—Continued.

St. Regis Everbearing

A Wonderful New Red Raspberry, bears fruit for four months the first season it is planted. Earliest of all Red Raspberries, begins to ripen June 15th to 20th, fruiting on old canes until late in August, when berries begin to ripen on the young or current season's canes, which continue to produce berries in increasing numbers without intermission until late in October, or until frost comes. Wonderfully prolific first or main crop being greater than that of any other red variety known, and summer or autumn crops do not consist of a few scattering berries, but good to heavy pickings all the time. One party who had a small patch of about half an acre picked and shipped two or three pickings each week for four months, and his profits were enormous. Berries remain large, firm and full flavored until the very last. Fruit is bright crimson, large size and of surpassing quality, firm in texture, an unexcelled shipper, will stand shipping 200 miles. A rich, sugary berry, with full raspberry flavor and most delicious. Canes

are of stocky, strong growth, and plants are absolutely hardy, enduring the severest cold uninjured. Will succeed on all soils. Set early in April, will give ripe berries the first season.

We have thoroughly tested this berry and believe it marks a great advance in red raspberries. This is the first season we have a sufficient number of plants to enable us to offer

them to the public. Have had a number of large berry growers from different parts of the State come here to our nurseries this fall to investigate the St. Regis, and they said it was the most wonderful berry they had ever seen.

All the photographs from which the illustrations of the St. Regis were made, were taken by our photographer in our nurseries in the open field on October 2nd, 1912, as per his affidavit on this page. We picked fruit, however, until November 7th, at which time the plants were in full foliage.

Price of St. Regis: 25c each, 6 for \$1.00, 12 for \$1.75, 100 for \$10.00.

Money refunded if you do not find this raspberry exactly as we represent.

This is to certify that the negatives, from which the illustrations of the St. Regis Raspberry used in this catalog were made, were taken by me on the 2nd day of October, 1912, and were from plants growing in the open field as illustrated in photograph of the block.

ROCHESTER, NEW YORK

Blackberries

	Doz.	100	1000
Price (except where noted)	\$0.50	\$2.00	\$15.00

Strong Root Cuttings, not sucker plants.

Blower. Originated in the celebrated small fruit belt of Chautauqua County, N. Y., where it has been thoroughly tested for several seasons. Claimed to be the hardiest, most productive, the finest quality, and to bring on the market the highest price of all blackberries. Has produced 2694 berries on one bush, 2720 quarts on $\frac{1}{3}$ acre. Large size, jet black, good shipper, best quality, unexcelled productiveness are the main characteristics of this splendid new sort. 60c per doz., \$3.50 per 100, \$25.00 per 1000.

Mersereau. A new berry of sterling qualities. Large size, good quality, hardy and productive. Highly recommended.

Eldorado. A strong growing hardy variety; very productive; fruit very large, jet black, in large clusters, ripening well together. Its keeping quality is unsurpassed. Fine quality, sweet, without core.

Rathbun. Origin western New York. A strong erect grower with strong stem, branching freely; will root from tip of branches like a raspberry. Hardy, having endured 20 degrees below zero, and produced a good crop. Forms a neat, compact bush 4 to 5 feet high, producing its immense fruit abundantly. Fruit is sweet and luscious, without hard core, of extra high flavor, jet black, small seeds; firm enough to ship and handle well. Very large size, resembling the Wilson and fully equal to that grand variety, with the addition of hardiness.

Erie. Fruit of the largest size; not entirely hardy; strong, healthy grower; free from disease; productive, very early, ripening before the Wilson; extra quality, good shipper.

Snyder. Early; good quality; immensely prolific; fair size; black, fine; one of the hardiest.

Ward. A New Jersey wonder. Undoubtedly a seedling of the Kittatinny, which it resembles, having all of its qualities and none of its de-

Blowers.

fects. A healthy, strong grower, with sturdy canes producing fine, large fruit, black throughout, without core, and of excellent quality. Has never suffered from winter injury in New Jersey. An exceedingly prolific sort, the bushes being covered with its fine fruit; produced as many bushels per acre as the Wilson in its prime. 60c per doz., \$3.00 per 100, \$20.00 per 1000.

Plum Collection No. 1.

1 Abundance, 1 Burbank, 1 Shippers Pride, 1 Monarch, 1 German Prune, 1 Yellow Egg. Best varieties for home Garden. Six extra fine trees, 2-year, 5 to 6 feet, for **98c**

Plum Collection No. 2.

2 Red June, 2 October Purple, 2 Fellenburg, 2 Moore's Arctic, 2 Lombard. Ten extra fine 2-year trees, 5 to 6 feet, for **\$1.48**

Peach Collection No. 2.

5 Early Crawford, 5 Late Crawford, 5 Carman, 5 Stearns, 10 Alberta. Thirty extra fine 4 to 6 foot trees, b e s t varieties. Regular price \$4.50. Special bargain price **\$2.78**

Select Apple Collection.

2 Baldwin, 1 Duchess Oldenburg, 1 Jonathan, 2 Rome Beauty, 1 King, 2 Wolf River, 1 Winter Banana. Ten strictly first class trees, 2-year, 5 to 6 feet, worth \$2.50, for **\$1.98**

Currants

Price of Currants (except where noted), strong 2-year plants: 10c each, \$1.00 per doz., 6.00 per 100, \$50.00 per 1000.

Black Champion. An English variety of great value; very sweet and delicious; bushes thrifty, strong; berries very large; early, prolific, fine.

Cherry. The standard Red Currant. Fruit very large; a fine, upright grower; valuable alike for market and garden; splendid quality...

Comet. New. Brilliant crimson; enormous size; refreshing and soft to the palate, without acidity. Valuable for dessert purposes.

North Star. Bunches average 4 inches long and are freely produced; very sweet and rich quality, firm, a good market sort. Hardy, strong grower.

Fay's Prolific. One of the very best and most popular red currants. It is very productive, hardy and vigorous; it will average larger than Cherry; of the finest quality, and brings best prices on the market; fruit bunches 3 to 5 inches long; easily picked.

Perfection. A new variety of highest excellence, originated at Rochester, N. Y., and awarded the Barry Gold Medal and other first prizes. Color bright red, size of berry and bush equal to Fay's, but said to be superior to it in quality and productiveness. Ripens with Cherry's or Fay's. 25c each; \$2.00 per doz.

Red Cross. A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

White Grape. A fine white variety; mild flavor; excellent quality; good for table use; very distinct and valuable.

Gooseberries

The Gooseberry thrives best on a cool, damp, rich soil. It should be annually pruned and mulched with manure.

The demand for this fruit is constantly growing, the expense of cultivation is light, and the returns most satisfactory. Good plants should

produce 200 bushels per acre the third year after planting, and from 300 to 400 bushels the fifth year.

Price of Gooseberries (except where noted) 15c each; \$1.50 per doz.; \$11.00 per hundred, \$100.00 per thousand.

Downing Gooseberries.

ROCHESTER, NEW YORK

GOOSEBERRIES—Continued.

Best Varieties.

Chautauqua. The bush is strong and vigorous, berries light yellow; free from spines and hair; veined and transparent; very sweet and delicious. Fruit 1 to $1\frac{1}{2}$ inches in diameter. 20c each; \$2.00 per doz.

Downing. Large, oval; very vigorous, hardy; foliage heavy, covering their fruit from the sun, and resisting mildew; bears abundantly. Greenish-white.

Houghton. Medium size, roundish, oval, sweet; very productive. Pale red.

Industry. Enormous size; dark red or cherry color, with numerous hairs; delicious when ripe. It has been fruited in this country for years with success, and is unequalled for size, flavor, productiveness and vigorous growth.

Pearl. Very hardy, entirely free from mildew; good quality and more productive than the Downing; greenish-white; large berry.

Red Jacket (Josselyn). This new American gooseberry is as large as the largest English variety. Berry smooth; very prolific and hardy; quality and foliage the best.

Victoria. This new gooseberry is a wonder. It is the strongest grower, the best cropper, and finest flavored of red gooseberries. It is superior to Industry in its growth, yielding larger crops of its delicious high flavored fruit, which is superb in quality, and ripens ahead of Industry. We bespeak for it great success. 25c each; \$2.50 per doz.

Rhubarb

Have a rhubarb patch. Six roots set early in the spring will supply a small family. Set plants 2 feet apart in the row. Good culture and plenty of dressing will give profitable returns.

Myatt's Linnaeus. Those who have never grown this variety, which is of superior quality, will hardly recognize the old "Pie Plant." It is early, tender, without being in the least tough or stringy, with a mild sub-acid flavor. Rhubarb is one of our most healthful vegetables. Early in the spring its distinctly acid flavor is quite acceptable. 10c each; 75c per 10; \$4.00 per 100; \$35.00 per 1000.

June 24th, 1912.

The trees I received from you this spring are looking fine, so far, so am enclosing you two more orders for nursery stock for next year.

IRVIN SITTER, Columbia County, N. Y.

May 24th, 1912.

The nursery stock came in good shape and seems to be good, clean and well rooted. Thanks.

E. G. MERRILL, Delaware Co., Pa.

June 20th, 1912.

Pardon my delay in letting you know I received trees in good condition in due time. Was very much surprised to receive so large trees. Have recommended you to my neighbors and think you will receive some orders from here next spring.

JACOB E. HOUTZ, Northampton County, Pa.

April 30th, 1912.

I enclose money order, \$5.85, for fruit trees. Please give this order your prompt attention and oblige me. I received those 12 trees I sent for as advertised by you and they arrived in good condition.

H. DOUGHERTY, Monroe County, Ohio.

Conover Colossal.

Asparagus

This delicious and healthy vegetable should be found in every garden. Nothing can be more easily grown and no plant gives such a healthful food for such a little outlay. Set in the fall or spring with the crown of the plant about three inches below the surface of the ground. Ten to twelve inches by two feet is a good distance to plant.

Conovers Colossal. A standard kind of first-class quality. Tender and high flavored; valuable market and garden sort.

Palmetto. Extensively grown for market on account of earliness, large size and fine appearance.

Price of Asparagus: 75c per 100; \$6.00 per 1000.

May 5th, 1912.

Gentlemen,—I received your Fruit Trees this week in fine condition. I am proud of the trees I got of L. W. Hall & Company and wish you success. Will remember you in the future.

J. E. LOMMASSON, Warren County, N. J.

We Prepay Freight on all orders for \$5.00 and over East of the Mississippi.

Campbell's Early.

Niagara.

Moore's Early.

Grapes Strong Two-Year Plants

Everyone should have a few grape vines in the home garden. They require very little cultivation and returns are quick and abundant. They can be trained over fences, trellises or doorways, and thus be ornamental as well as useful. To grow for market they can be planted on hill sides that are unsuitable for other crops. Sunny exposure is desirable. If planted alongside of fence or buildings, set about 8 feet apart. For vineyard planting, make rows about 8 feet apart and set vines from 6 to 10 feet apart in the row. The plants we offer are strong 2-year vines, and the following is a list of the best and leading varieties.

Price of Grapes (except where noted): 15c each; \$1.00 per doz.; \$6.00 per 100; \$50.00 per 1000.

Alice. Without doubt the best long keeping grape ever offered. It is a light red grape; clusters medium size. Perfectly hardy; strong grower. Very free from mildew or other disease. 25c each; \$2.50 per doz.; \$18.00 per 100.

Brighton (Red). Highest quality, melting, delicious; large clusters, hardy, almost seedless.

Campbell's Early. A new Black Grape, said to be superior to Concord in many respects, ripening about with Moore's Early. Cluster and berries very large and handsome. Skin thin. Flesh firm, tender, separating easily from the seeds. Flavor rich, sweet, slightly vinous and without acidity from the skin to the center. A very strong, vigorous vine. Thick, healthy foliage. Its early ripening, keeping and shipping qualities make it a very valuable market grape. 25c each; \$2.00 per doz.; \$15.00 per 100.

Concord (Black). Too well known to need much description; is considered by many to be the best all-round grape grown; is extremely hardy, vigorous and productive; bunches large, compact; berries large, juicy, buttery and sweet. Will succeed well most anywhere.

Delaware. A delicious little red table grape; juicy, sweet, hardy and productive.

Diamond. A white grape of high quality; melting and delicious; large cluster, hardy.

Green Mountain. This extra early grape was found growing in the Green Mountains of Vermont at an altitude of 1,400 feet, where it ripens its fruit perfectly. Color greenish-white, skin thin, pulp exceedingly tender and sweet, containing but one or two seeds. The first white grape to ripen. Quality superb. 20c each; \$2.00 per doz.; \$15.00 per 100.

McPike. A seedling of the Worden; fully as vigorous, hardy and productive; ripening at same time. Bunch very large, compact, black with blue bloom; berries mammoth size, usually three inches in circumference. Has been well tested and easily takes first rank as the best large grape. 25c each; \$2.50 per doz.; \$18.00 per 100.

Moore's Early (Black). Very early; large berry, extremely hardy, vigorous.

Niagara (White). A great yielder and of fine flavor; ripens early, clusters very solid; large vines.

Worden (Black). A seedling of the Concord; bunch large and compact, berry round, black with blue bloom; pulpy, juicy and very pleasant; ripens several days earlier than Concord.

Don't overlook our Special Bargain Collections

Old Glory Grape Collection

2 Brighton (Red), 2 Niagara (White),
2 Concord (Blue). Six strong
2-year vines for 50c

April 30th, 1912.

Have just received 12 large, fine looking fruit trees from your firm, just as you advertised to send, and all for the sum of 94 cents. Have had the enclosed order ready to send you for some time past, but was waiting to see the trees just received. Have just shown them to one of my neighbors, a farmer; he was very much interested and asked for your catalogue. Thank you for sending such fine looking trees. Shall speak a good word for you whenever I can.

MRS. K. H. OLIVER, Hampshire County, Mass.

Ornamental Department

Trees for Special Purposes

For City Streets and Avenues—Sugar Maple, Norway Maple, American Elm, American Ash, Pin Oak, American Linden, Oriental Plane.

Rapid Growing Street Trees—Silver Maple, Ash-leaf Maple, Carolina Poplar.

Best Lawn Trees—Norway Maple, Schwedler's Maple, Cut-leaf Weeping Birch, Catalpa Speciosa, Purple-leaf Beech, Tulip Tree, American Mountain Ash, the Oaks, English Elm, the Lindens.

Low Growing Lawn Trees—Japan Maple, Catalpa Bungeii, Japan Weeping and Flowering Cherries, the Dogwoods, Double Flowering Thorns, Magnolias, Weeping Mulberry, Bechtel's Flowering Crab, Camperdown Elm.

Trees for Screens—Carolina and Lombardy Poplar, Laurel-leaf Willow, Golden Willow, White Flowering Dogwood.

Birch, Cut-leaved Weeping. One of the most elegant of all weeping trees. Its tall, slender, yet vigorous growth, graceful, drooping habit, silvery white bark and delicately cut foliage present a combination of attractive characteristics rarely met in a single tree. **5 to 6 feet, 50c each; \$5.00 per doz.** **6 to 8 feet, 75c each, \$7.50 per doz.**

Beech, Purple-Leaved (Purpurea). A remarkable variety, with very dark purplish foliage, changing to crimson, and again in the fall to dark purplish green, making a striking contrast with the green of other trees. Highly ornamental and desirable. When fully grown, 40 to 50 feet high. **4 to 5 feet, 50c each.**

Bungei (Umbrella Catalpa). Grafted on stems six to eight feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped, deep green; lie like shingles on a roof; always make a symmetrical head. One of the most unique trees; a valuable acquisition, desirable for lawn, park and cemetery planting. **\$1.00 each; \$10.00 per doz.**

Catalpa Speciosa. One of the most beautiful lawn or street trees, producing magnificent flowers early in spring; very rapid growing; beautiful. **8 to 10 feet, 50c each.**

Crab, Bechtel's Double-Flowered (American). Tree medium size, covered in early spring with beautiful double-pink fragrant flowers that look like roses at a distance. **4 to 5 feet, 50c each.**

Catalpa Bungei.

L.W. HALL & COMPANY

ORNAMENTAL TREES —Continued.

Elm, American White. A noble drooping, spreading tree of our own woods; one of the grandest of park and street trees. 8 to 10 feet, 75c each; \$7.50 per doz.

Elm, Camperdown Weeping. Grafted 6 to 8 feet high, this forms the most picturesque of drooping trees. The leaves are large, dark green and glossy. \$1.50 each.

Horse Chestnut. The well known species; has magnificent spikes of white flowers. 6 to 7 feet, 75c each.

Horse Chestnut, Red-flowering. Showy red flowers; makes a large tree; very handsome. 6 to 7 feet, \$1.00 each.

Linden (American Basswood). A rapid growing, native tree, with very large leaves and fragrant flowers. 7 to 8 feet, 50c each.

Linden, European. Fine pyramidal tree, smaller in all parts than the American linden; more valuable for lawn planting. 7 to 8 feet, 75c.

Magnolia, Conspicua. A beautiful variety, with large white flowers that appear before the leaves. Tree of small size, very handsome. 4 to 5 feet, \$1.50 each.

Cut-Leaf Weeping Birch.

Magnolia, Soulangeana. Flowers white and purple; foliage large, glossy and massive; very profuse; hardy, and one of the most desirable. 4 to 5 feet, \$1.50 each.

Magnolia, Speciosa. Flowers smaller than Soulangeana; blooms later; hardy and desirable. 4 to 5 feet, \$1.50 each.

Maple, Ash - Leaved. A fine, rapid growing variety; very hardy, and excellent for avenues. 8 to 10 feet, 50c each.

Maple, Cut-leaf Purple, Japan. Dwarf and weeping, leaves rose color, changing to a deep purple. Leaves deeply cut, wood crimson colored. Very attractive. 3 feet, \$1.50 each.

Maple, Norway. A distinct foreign variety, with large, broad leaves of the deepest green. It retains its leaves long after other trees are bare. 6 to 8 feet, 75c each.

each. 8 to 10 feet, \$1.00 each.

Maple, Silver-leaved. An excellent shade tree of rapid growth; desirable for quick effects. 8 to 10 feet, 50c each.

Maple, Sugar. A very popular tree both for lawns and avenues; symmetrical. 8 to 10 feet, 75c each.

Norway Maple.

Ash Leaved Maple.

ROCHESTER, NEW YORK

ORNAMENTAL TREES—Continued.

Maple, Weir's Cut-leaved. A variety with cut or dissected foliage; branches slender and drooping, almost as graceful as the Cut-leaved Birch. The foliage is silvery underneath. 8 to 10 feet, 75c each.

Mountain Ash (European). A fine hardy tree; head dense and regular, covered from July till winter with great clusters of bright red berries. 7 to 8 feet, 50c each.

Mountain Ash, Weeping. Very odd and attractive; covers the ground completely, making a perfect shade. 6 to 7 feet, \$1.00 each.

Mulberry (Downing) Everbearing. Berries mild and pleasant. Bears at four and five years of age; continues in fruit from July to September. 5 to 7 feet, 50c each.

Mulberry, Tea's Weeping. Perfectly hardy, forming a natural umbrella-shaped top or head; foliage handsome; a fine ornament for the lawn. 6 to 7 feet, \$1.50 each.

Oriental Plane (Orientalis). Leaves heart-shape at base, deeply cut. Is among our tallest trees, growing rapidly into massive proportions. Hardy and free from disease. It does well in cities and near the seashore, and is not affected by insects. 8 to 10 feet, 75c each.

Plum, Purple-leaf (Pissardi). Perfectly hardy. The leaves are rich purple, retaining their bright color through the entire season. Profusion of white blossoms in May, followed by small purplish-red edible fruit. 5 to 7 feet, 50c each.

Poplar, Carolina. A native tree of rapid growth, with large, glossy leaves; valuable for park or street planting; a fine shade tree. 8 to 10 feet, 50c each. 10 to 12 feet, 75c each.

Thorn, Paul's Double Scarlet. Flowers deep crimson, with scarlet shade; very double. 4 to 5 feet, 50c each.

Willow, Babylonian (Weeping Willow). Tall, graceful and drooping; very beautiful. 6 to 8 feet, 50c each.

Evergreens

Arbor Vitae (Thuji)

American (Occidentalis). A well-known variety of great value; it forms an upright conical tree of only medium size and is, all things considered, the finest Evergreen for screens, being hardy and more easily transplanted. Grows rapidly, and with little care; or rather, by easy management, it soon forms a most beautiful hedge, very dense, and perfectly impervious to the sight. It is not adapted to turn stock, but forms a most desirable and ornamental screen to divide the lawn from other parts of the ground, or for any similar purpose. 18 to 24 in.: 25c each, 10 for \$2.00, 100 for \$15.00. 2 to 3 feet: 35c each; 10 for \$3.00; 100 for \$25.00.

Hovey's Golden (Hoveyi). A hardy variety of rich golden shading. 18 to 24 in., \$1.00 each.

Pyramidal (Pyramidalis). Of upright, compact habit, resembling Irish Juniper. 2 feet, 50c each.

Siberian (Siberica). Well known and deservedly popular on account of its hardness, being able to endure the changes of our climate, and as it retains its dark green color, it is an excellent lawn tree, and of great value for ornamental screens and hedges. 2 feet, \$1.00 each.

American Elm growing on Latta Road near Rochester. Considered one of the finest specimens in the country.

EVERGREENS—Continued.

Juniper (*Juniperus*)

Irish. A very pretty little tree or shrub, forming a neat, tapering column of deep foliage; very hardy and desirable for planting on lawns, or in cemetery lots, where larger evergreens are not admirable. 2 feet, 50c each.

Pine (*Pinus*)

Austrian, or Black. From Central Europe, where it grows over one hundred feet high; remarkably robust, with long, stiff leaves and deep green foliage; hardy everywhere, and valuable for planting as windbreaks, screens, etc. 2 feet, 75c each.

Scotch. A native of the British Isles. A fine, robust, rapid-growing tree, with stout, erect shoots, and silvery green foliage. Very hardy; valuable for shelter. 2 feet, 75c each.

Spruce (*Picea*)

Picea (Norway Spruce). Lr. The most generally used of evergreen trees. Useful for screens and windbreaks on account of its rapid growth. It makes a tall tree, and as an individual tree, with room to develop, is of pyramidal, symmetrical growth, its lower branches sweeping the ground. 18 to 24 in., 25c each; 10 for \$2.00; 100 for \$15.00. 2 to 3 feet, 35c each; 10 for \$3.00; 100 for \$25.00.

Colorado Blue. The finest of evergreens. One of the most beautiful and hardy of spruces; foliage a rich sky blue; very handsome. 2 feet, \$2.00 each.

May, 1912.

Received trees all O. K. and well satisfied with them. Will send a large order in the spring, as it is too late this spring.

M. A. PLATE, Brunswick County, N. C.

Norway Spruce.

Hedge Plants

California Privet. This is the most glossy-leaved and rapid growing of all the half-evergreen plants used for low hedges around private lawns and is the universal favorite. Adapted to all parts of the country. 12 to 18 inches, \$2.00 per 100; \$17.00 per 1000. 18 to 24 inches, \$3.00 per 100; \$25.00 per 1000. 2 to 3 feet, \$4.00 per 100; \$35.00 per 1000.

Barberry, Thunbergii. A native of Japan. A pretty species, of dwarf habit, small foliage, changing to a beautiful coppery-red in autumn. Valuable as an ornamental hedge. 12 to 18 inches, \$9.00 per 100; \$80.00 per 1000. 18 to 24 inches, \$15.00 per 100; \$120.00 per 1000.

Also American Arbor Vitae and Norway Spruce (see description under Evergreens).

California Privet.

October 15th, 1912.

Enclosed please find order. I am ordering from you by the advice of Mr. H. N. Redman, who has been much pleased with the goods you sent to his New Hampshire farm.—MISS ALICE A. CAPPS, Ulster County, N. Y.

Dogwood Blossoms.

Ornamental Shrubs

A good Shrub collection presents the greatest variety of color throughout the season, both in flower and foliage. Even in Winter it is attractive in appearance from the gracefulness of its stems and branches and from the color of its bark. When right selections are made they serve almost as well as evergreens to shut out from view fences and other low, unsightly objects. If the grounds are small, a few shrubs such as Altheas, Hydrangeas, Spireas and other sorts can be used to good advantages. Vines trained over porches, trellises, fences, etc., can be made very effective at a small cost and give great comfort and satisfaction. Our Shrubs are all healthy, hardy specimens, at least 2 years and more often 3 to 4 years old. They vary in size according to the thriftiness of the variety, but all have from 2 to 4 strong canes and will thrive anywhere with a reasonable amount of care and attention.

To assist our customers in making selections we have made up a list of a few shrubs for special purposes.

For Shady Places, where large trees cause shade or buildings shut out the sunlight: White Fringe, the Dogwoods, the Flowering Currants, Common Privet, Rhododendron, all Evergreen Shrubs.

Bright-Berried Shrubs, holding their fruit nearly all winter: The Barberries, the Viburnums, the Snowberries, Flowering Currants, Bush Honeysuckles.

Shrubs Grown in Standard Form: Strawberry Tree, Altheas, Hydrangeas, Double Flowering Plum, Snowballs, Double Flowering Peach, Lilacs, Wisteria, Tree Roses in variety.

PRICE OF SHRUBS

25c each, \$2.50 per doz. (except where noted)

Althea (Rose of Sharon). One of the most showy flowering shrubs; strong, erect growing, with large, bell-shaped flowers of striking colors, borne abundantly in August and September, when most other shrubs are out of bloom. Colors: White, red, rose, purple, blue and variegated. Single and double.

Azalea (Mollis). A beautiful species from Japan, with large flowers of fine shape, perfectly hardy. Colors orange, yellow and carmine. 75c each.

Barberry, Purple-leaved. Foliage and fruit of a violet purple color, very striking; fine for single specimens; also desirable for ornamental hedges.

Barberry, Thunberg's. Dwarf habit, small foliage, changing to beautiful red in autumn.

Deutzia
Pride of Rochester.

ORNAMENTAL SHRUBS— Continued.

Calycanthus (Sweet-scented Shrub). Very desirable; the wood is fragrant, foliage rich, flowers of a rare chocolate color, deliciously fragrant; blossoms in June and at intervals thereafter.

Cornus Elegantissima (Dogwood). A variety with dark green foliage, margined with silver and red; wood dark red. A beautiful and attractive free-flowering shrub.

Deutzia, Gracilis (Slender Branched Deutzia). A dwarf variety, covered with white flowers in June. Well adapted to planting in cemetery lots or small door yards; fine for pot culture. Flowers freely during the winter. First to flower. 35c each.

Deutzia, Pride of Rochester. Very large double white flowers. It excels in size of flower, profuse bloom and vigorous growth; nearly a week earlier than Deutzia Crenata.

Elder, Golden (*Sambucus Aurea*). A beautiful shrub, with golden-green foliage when planted in the sun. Very valuable.

Forsythia (Golden Bell). A medium sized shrub with drooping yellow flowers early in the spring before the leaves.

Hydrangea Arborescens Sterilis (Hills of Snow). This superb new Hydrangea is a variety of the hardy native species *H. arborescens*, commonly found "wild" in most of the states east of the Mississippi river. The Sterilis is likewise absolutely hardy and is, moreover, of easy culture and is an exceedingly prolific bloomer. A five-year-old plant has produced one hundred and twenty-six perfect blooms at one time. 50c each.

Spirea Van Houttei.

Hydrangea Paniculata Grandiflora. Hardy in all sections of the country and very easy to grow. The flowers are immense, greenish-white when first open, changing to pure white and turning pink with age. Commences to flower in July and remains in flower until November.

Hydrangea P. G., Tree Form. Same as above but grown in tree form with single stem. Very fine and desirable. 50c each.

Fringe, Purple. A beautiful distinct shrub, with large bunches of feathery flowers which give the tree the appearance of being covered with a cloud of smoke.

Kerria, Japonica (Globe Flower). A handsome bush with smooth green bark and orange yellow, double flowers, very pretty and desirable.

Lilac, Purple. Bluish-purple flowers, standard variety; always good. 25c each.

Lilac, White. Cream colored flowers; very fine. 25c each.

Lilac, Chas. X. Large shining leaves; flowers large, single, reddish-purple. 50c each.

Lilac, Lemoine. A choice variety bearing large clusters of double white flowers. 50c each.

Lilac, Ludwig Spaeth. New and believed to be the finest of the class. Color, purplish-red. 50c each.

Lilac, Pres. Grey. Very large blue flowers; largest of all. 50c each.

Paeonias. Fine hardy plants, rivaling the rose in perfection of bloom and coloring, and requiring little extra care, as they thrive well in any soil. Colors: Blush, crimson, purple, pink, red, variegated, white and yellow.

Paeonia, Fringe-leaved. Beautiful foliage in threadlike filaments; flowers very double, of dark satiny crimson color. Rare and exquisitely lovely.

Hydrangea Paniculata Grandiflora.

ROCHESTER, NEW YORK

Japan Snowball.

Ribes (Currant) Crimson-flowering
(*R. sanguineum*).

Produces crimson flowers abundantly in early spring.

Ribes, Yellow-flowering
(*R. aureum*). A native species with yellow flowers.

Snowball (*Viburnum*). The common large white Snowball.

Snowball, Japan. An erect, compact shrub, blooming in June, the plants being completely covered with large balls of flowers as white as snow. The foliage is dark green. 35c each.

Spirea, Anthony Waterer. A new dwarf flowered variety, 15 to 18 inches high; crimson flowers. Perfectly hardy; it makes a fine, compact plant.

Spirea Billardi. Fine foliage, with spikes of red colored flowers during summer and fall.

Spirea Bumaldii. A fine Japanese variety of dwarf, compact habit, covered during midsummer and autumn with masses of bright rose-colored flowers.

Spirea Van Houttei. Without doubt the grandest of all the Spireas; beautiful at any season, but when in bloom is a complete fountain of white flowers, the foliage hardly showing. Perfectly hardy and an early bloomer.

Syringa (Mock Orange) Golden-leaved. A plant of medium size with golden yellow foliage. It keeps its color the entire season; very sweet scented.

Weigela, Candida. A strong, upright grower; flowers pure white, in great profusion in June.

Weigela, Rosea. A beautiful shrub bearing rose-colored flowers in May and June.

ORNAMENTAL SHRUBS—Continued.

Phlox, Hardy. Very fine; perfectly hardy; beautiful plants. Colors purple, lilac, white and pink. 15 cts. each; \$1.50 doz.

Ribes (Currant) Crimson-flowering
(*R. sanguineum*).

Produces crimson flowers abundantly in early spring.

Ribes, Yellow-flowering
(*R. aureum*). A native species with yellow flowers.

Snowball (*Viburnum*). The common large white Snowball.

Weigela, Eva Rathke. A charming new variety; flower brilliant crimson, a beautiful, distinct, clear shade; flowers twice in one season.

Iris (Fleur de Lis) Germanica (German Iris). These are among the most desirable early spring flowering plants. Flowers are large and of the most exquisite coloring. Every garden and border should have a liberal planting of these beautiful plants, of which we have the following colors: Blue, lavender, maroon, purple, white and yellow. 15c each, \$1.50 per doz.

Iris Kaempferi (Japan Iris). Flowers differ from the German Iris in being broad and flat. They exhibit a wonderful variety of colors and shades and appear later than the others. They rank among the most desirable of hardy plants; succeed best in a moist soil; July. 15c each; \$1.50 per doz.

Rhododendron

There is no more attractive feature of a fine country place than the rich bloom of Rhododendrons in the latter part of May and early June. The huge clusters of flowers in many shades of pink, violet, rose, purple, and delicate creamy white, give them right to the first rank among evergreen shrubs. The pride of every fine English home is a collection of these plants. But little labor is required to grow them. Their beauty pays for the labor.

\$1.00 each; \$10.00 per doz.

Rhododendron.

Hall's Japan Honeysuckle.

Climbing Vines

Clematis

As a climbing vine Clematis has no equal. Its great rich masses of flowers and rapid growth combine to make it the most desirable flower for verandas, screens, walls, arbors, etc. It requires good, deep, sandy loam, well enriched.

Henryii. Single. The finest white clematis. Very large fine flowers; grows rapidly. Blooms freely during summer and autumn. 35c each; 3 for \$1.00.

Jackmanni. Single. Very large; deep purple; forms a perfect mass of the richest bloom; rapid grower and the very best purple sort. 35c each; 3 for \$1.00.

Mad. Ed. Andre. Flowers medium size, deep crimson-red; velvety; very free flowering; continuing during summer. Distinct and fine. 35c each, 3 for \$1.00.

Paniculata. Single. White, of extremely rapid growth, with dark, shining green foliage, and a profusion of flowers which are small, but borne in large panicles. Very popular. 25c each; 5 for \$1.00.

Ramona. This magnificent new Clematis is an American seedling and consequently is extremely hardy. The Ramona is a strong, rampant grower, fully three times as strong as the Jackmanni, often growing ten or twelve feet the first season. It is a perpetual bloomer, giving an abundance of flowers through the season. In color it is a very deep sky-

blue, distinct from any other kind, and very attractive. 50c each.

Ampelopsis (Boston Ivy). For covering buildings of brick or stone; for churches, walls, etc.; requires no support, clings tightly to the smoothest surface. Bright green leaves changing to brilliant colorings in autumn. It has no equal. 25c each; 5 for \$1.00.

Dutchman's Pipe. A magnificent hardy vine of rapid growth with very large, heart-shaped leaves and brownish flowers, resembling a miniature pipe; splendid for archways or verandas. 35c each; 3 for \$1.00.

Honeysuckle (Hall's Japan). Almost evergreen, with pure white flowers, turning to yellow; very fragrant; vigorous, covered with flowers from July to December. 25c each.

Chinese Matrimony Vine. Vigorous and hardy climber; flowers bright purple, succeeded by scarlet berries nearly one inch long. Excellent for trellises. 25c each; 5 for \$1.00.

Wistaria, Chinese Purple. One must see this plant in bloom to appreciate its magnificence. Perfectly hardy; it flowers in spring in long, drooping racemes; very beautiful. 35c each; 3 for \$1.00.

Clematis Paniculata.

April 29th, 1912.

I received the fruit trees in fine condition on the 24th inst. You may depend upon me for my patronage in the future. I remain, respectfully yours,

B. LANGE,

Kent Co., Delaware.

Frau Karl Druschki.

Roses

It is impossible to exaggerate the beauty of the Rose; its very name suggests beauty and fragrance. It is now possible to have roses all summer, even with but a small garden, and we will gladly aid you in selection of hardy varieties that will bloom from Spring until November. Our Roses are strong dormant plants grown out of doors, are well rooted and in every way first-class. They have in most cases already bloomed before being sent out, and we believe will give satisfaction and permanent success. Full planting and cultural directions will be sent with each order.

Twelve "Best" Hardy Perpetual Roses

We are often asked to name one dozen of our best hardy Roses. The twelve varieties described below are selected with a view of suggesting to the amateur, not familiar with the many vari-

eties offered in the general list, a collection which combines a wide range of color, form, freedom of bloom, fragrance and hardiness. 25c each, \$2.50 per dozen. This set of 12 best varieties for \$2.50.

Alfred Colomb. Clear, bright carmine, very large, full and finely shaped; fragrant and a free bloomer.

Baroness Rothschild. A superb Rose, of pale, satiny rose; very large.

Frau Karl Druschki. This is the ideal hardy white Rose; pure in color, perfect in form; strong grower and remarkably free flowering. Superb in every way.

General Jacqueminot. Brilliant scarlet-crimson. An old favorite and one of the best known Roses in cultivation. Does well everywhere.

Margaret Dickson. White, tinted with rose; large, full and of good shape. Very distinct and pleasing.

Mad. Gabriel Luizet. Deep rosy-pink; outer petals shaded with pale flesh.

Mrs. John Laing. Soft pink, of beautiful form; exceedingly fragrant and remarkably free-flowering. Always does well and stands very close to the top among fine Roses.

Marshall P. Wilder. Cherry carmine. Unsurpassed.

Paul Neyron. Dark Rose of enormous size; perhaps the largest of all.

Prince Camille de Rohan. Deep, velvety crimson-marrow, shaded scarlet. A magnificent dark Rose.

Soleil d'Or. Gold and orange to reddish gold. A color peculiar to itself.

**General
Jacqueminot.**

ROSES—Continued.

Ulrich Brunner. Bright cherry-red; flowers large and full. A good strong grower and always does well.

Twelve Grand Everblooming Roses

This collection includes the most popular of the Bedding Roses, most of which are familiar to all. They are thoroughly tested varieties and combine in a large degree the hardiness of the Hybrid Perpetual class with the free-flowering qualities of the Tea Roses. They will withstand the Winter here with some protection. We especially recommend this collection to those wishing constant bloom for cutting throughout the Summer and Autumn months.

35c each, \$3.00 per doz. This set of 12 varieties for \$3.00.

American Beauty. The world-famous rose. Large, deep rose; very double, with a delightful fragrance.

Baron de Bonstetten. Rich, velvety maroon, large and full; a splendid sort.

Caroline Testout. Large, double, clear bright rose; very sweet. Plant of sturdy habit and very free blooming.

Champion of the World. Flowers of large size. Color, lovely clear deep pink. A very free blooming hardy rose.

Duchess of Albany, or Red La France (Hybrid Tea). Resembles the La France but is much deeper in color. Is a free bloomer, producing an abundance of lovely buds and flowers throughout the season. Very double and full. Color, brilliant rose pink. Exquisitely shaded.

Killarney.

Etoile de France, vig. (Hybrid Tea). Velvety crimson, on stiff, erect stems, cupped form; continuous and free flowering. Very fragrant.

Gruss an Teplitz. Color of the richest scarlet, shading to velvety crimson; blooms constantly.

Hermosa. Bright rose, flat form, very double. A constant bloomer and quite hardy.

Kaiserin Augusta Victoria. Delicate creamy white; beautiful in bud and flower.

Killarney. Large buds, long and pointed. Color flesh, shaded white, suffused with pale pink. Blooms throughout the season.

La France (H. T.) Silvery rose, changing to pink.

Mme. Charles Wood. Very bright rich cherry-red; early; profuse bloomer.

Gruss an Teplitz.

Flowering Shrub Collection for \$1.75.

Ten fine Shrubs, strong plants that will blossom this year. 1 Hydrangea, 2 Paeonia [best varieties], 2 Lilac [purple, white], 1 Spirea Van Houteii, 1 Deutzia, Pride of Rochester, 1 Althea, 1 Snowball, 1 Forsythia. **\$1.75**

ROCHESTER, NEW YORK

ROSES—Continued.

Miscellaneous Roses

Annie Muller (Pink Baby Rambler). This excellent novelty is the result of a cross between the Crimson Rambler and George Pernet. The brilliant rose flowers are produced in large clusters and in great profusion from June until late in the fall. 35c each.

Baby Rambler. A dwarf variety of the Crimson Rambler. A constant bloomer. Very popular. 25c each.

Coquette des Alps. One of the finest pure white roses; full and finely formed; profuse bloomer; hardy and beautiful. 25c each.

Earl of Dufferin. Rich, brilliant, velvety crimson, shaded with dark maroon; large, full; finely formed; delightfully fragrant. 25c each.

Marchioness of Londonderry. Color ivory-white; petals shell-shaped, reflexed; highly perfumed, free flowering. Very fine. Awarded gold medal. 25c each.

Magna Charta, vig. Pink, suffused with carmine; full, globular. Foliage and wood light green, with numerous dark spines. A fragrant, excellent rose. Valuable for forcing. 25c each.

Persian Yellow. Deep, bright yellow; small, but handsome; a very early bloomer. 25c each.

Crested Moss. Deep pink, buds surrounded with mossy fringe and crest. 25c each.

Rosa Rugosa (var. Rubra). A Japanese variety with flowers of a beautiful bright rose-crimson, single and succeeded by large berries of rich rosy-red. A good hedge rose. Very ornamental. 25c each.

October 29th, 1912.

Trees have arrived in good order and am well pleased.—E. LAMOREAUX, Orange County, N. Y.

Mrs. John Laing.

Rose Garden for 98c.

1 General Jack, 1 Mrs. John Laing, 1 Mrs. Margaret Dickson, 1 Paul Neyron, 1 Persian Yellow, 1 Dorothy Perkins. Six fine 2-year Rose Bushes for only	98c
--	------------

Flower of Fairfield.

Tree Roses

75c each; 3 for \$2.00, except Baby Rambler.
Baby Rambler Tree Rose, \$1.00 each, 3 for \$2.75.

The Tree Roses are grafted on hardy rose canes four to five feet high, are tree-shaped, and when in bloom are objects of beauty, making handsome plants for the lawn. We can supply White, Red, Pink, Yellow and Crimson, named varieties, and also Crimson Rambler and Baby Rambler. Extra fine strong trees that will bloom the first year.

March 4th, 1912.

. . . Also in a year or two I will be in the market for an acre of plums and cherries, and of course because of your willingness to do the square thing without any quibbling the business will be yours. Another matter, the neighbors have been watching this stock pretty close and many said because of the low price you gave me it would be N. G., but when it came and they saw it, that stopped their argument. . . . With best wishes for your success, I am,
JAS COCKBURN, Lycoming Co., Pa.

April 29th, 1912.

I received my order of nursery stock today, came in good condition and are fine trees. I thank you for them and for giving my order such prompt attention. I shall not forget to recommend your company.

FREEMAN E. WILCOX, Wyoming Co., N. Y.

May 9th, 1912.

The balance of my stock came in good condition, are in the ground and have started right in to do business. I thank you for your promptness and good work.

DR. F. M. INGALLS, Lake County, Ill.

April 26th, 1912.

Shipment of trees (collection) received in good order. All I can say is that I am more than pleased with them. If it wasn't too late in the season would certainly get another collection.

A. J. WIESNER, Bergen County, N. J.

ROSES—Continued.

Climbing Roses

25c each, except where noted.
Baltimore Belle. White, tinged with blush; very double; flowers in clusters.

Crimson Rambler. Flowers a rich glowing crimson, bright and clear, and remain on the plant in perfect condition, with their freshness and beauty unimpaired for more than two weeks. They are borne in immense clusters. Entirely hardy. Awarded three gold medals.

Queen of Prairie. Rosy red; flowers large and compact. Very popular.

Dorothy Perkins. Color shell-pink; pointed buds; flowers borne in clusters; very double, with beautiful, crinkled buds. The only sweet-scented Rambler Rose.

Flower of Fairfield (Everblooming Crimson Rambler). A sport or offspring of the popular Crimson Rambler. It surpasses any other rose for brilliancy of display. Blooming in the early spring, it continues until well along in the autumn, bearing large, brilliant crimson clusters of flowers with the greatest freedom. It has the additional advantage of blooming profusely on the young wood in one-year-old plants. 35c each.

Tausendschon (Thousand Beauties). New. Imagine a luxuriant climbing rose literally covered with thousands of bright blossoms, borne in clusters and quite double. Colors of every imaginable shade, from white to deep pink. A hardy, vigorous grower with few thorns and handsome foliage. 50c each.

Tausendschon.

Distances for Planting

Standard Apples	30 to 40 feet apart each way
Standard Pears and Strong Growing Cherries.....	20 " " "
Duke and Morello Cherries.....	18 " " "
Standard Plums, Peaches, Apricots and Nectarines.....	16 to 18 " " "
Dwarf Pears	10 to 12 " " "
Dwarf Apples	10 to 12 " " "
Quinces	10 to 12 " " "
Grapes	rows of 10 to 16 feet apart; 7 to 16 feet in rows
Currants and Gooseberries..... 4 feet apart
Raspberries and Blackberries 3 to 4 by 5 to 7 feet
Strawberries, for field culture..... 1 by 3 to 3½ feet
Strawberries, for garden culture..... 1 to 2 feet apart
Asparagus, for field culture..... 1 by 3 feet
Asparagus for garden culture..... 1 by 1½ feet

Number of Trees on an Acre

40 feet apart each way.....	27	10 feet apart each way.....	435
30 " " " "	50	8 " " "	680
25 " " " "	70	6 " " "	1210
20 " " " "	110	5 " " "	1745
18 " " " "	135	4 " " "	2725
15 " " " "	205	3 " " "	4840
12 " " " "	300		

Rule.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

Special Sample Collection

**Twelve Fruit Trees, two-year, four to five feet, for
94c**

1 Baldwin Apple	1 Montmorency Cherry
1 Delicious Apple	1 Early Richmond Cherry
1 Transcendent Crab Apple	1 Tartarian Cherry
1 Flemish Beauty Std. Pear	1 Burbank Plum

The New Climbing American Beauty Rose
Distinct from the old-fashioned climbing or rambler type of roses

LIMBING AMERICAN BEAUTY

A New and Wonderfully Beautiful Rose

The American Beauty in all its glory and fragrance, but hardy as an oak, a prolific bloomer and a strong grower, thriving and blooming in almost any situation.

The Climbing American Beauty is the result of a cross between an unnamed seedling and the grand old American Beauty, thereby producing an American Beauty Rose of the same color, size and fragrance as its pollen parent, with the addition of beautiful, lasting foliage and better blooming quality. One plant of this new rose will produce twenty times as many blooms in June as the old American Beauty, besides blooming occasionally during the summer. Over nine hundred blossoms and buds have been counted on one four year-old-bush.

The roses grow on single stems, measure three to four inches in diameter and have the same exquisite fragrance as the old American Beauty, thus making the Climbing American Beauty a high-class Rose.

While the old American Beauty is rarely satisfactory, planted in the open ground, this new seedling has proved perfectly hardy, stands heat and drought as well as any rose and the foliage is green and beautiful until the snow falls. In addition to these outdoor qualities, this rose can be bloomed successfully under glass through the winter.

This wonderful new rose is called the CLIMBING American Beauty on account of its hardiness and unusually strong-growing qualities, and also to distinguish it from the old American Beauty. It should not be classed among the old-fashioned climbers or the rambler type of roses, as it is distinct from them. Although the Climbing American Beauty can be trained successfully to trellises and porches it is unequaled as a pillar rose and grows magnificently in bush form, as shown in the illustration.

No lover of roses should fail to plant the Climbing American Beauty, as it is a worthy ornament to any garden, and its beauty and fragrance will prove a lasting pleasure.

HYDRANGEA ARBORESCENS STERILIS
HILLS OF SNOW

THE GRAND NEW HARDY HYDRANGEA

Hydrangea Arborescens Sterilis

HILLS OF SNOW

This fine variety of the Hydrangea is fast taking the place in public favor so long held by Hydrangea Paniculata Grandiflora. It is perfectly hardy and of easy culture. The flowers are purer white than those of Hydrangea P. G., are quite as large, and are borne in as great or greater profusion, remaining on the bush long after the foliage has disappeared and well into the winter.

HYDRANGEA ARBORESCENS STERILIS has all the good qualities of Hydrangea Paniculata Grandiflora and others peculiarly its own. While quite as bold and striking in its general characteristics it is coupled with a grace and elegance not found in the old favorite. Grows four to ten feet high and adapted for single specimens, groups or hedges.

GENUINE BEAUTIES

Pictures do Them Injustice.
Must be Seen to be Appreciated.

VREDENBURG & CO. ROCHESTER, N.Y.

THOUSAND BEAUTIES.

(TAUSEND SCHON)

The greatest sensation in climbing roses, not excepting the world famous Crimson Rambler. Flowers vary in color from rosy carmine to white, grow in clusters of eight to fifteen individual flowers, large and quite double. A strong grower and perfectly hardy. Pronounced the most remarkable rose known.

A GRAND NEW ROSE

THOUSAND BEAUTIES, or Tausendschon, as it is called in German, is the most wonderful of the many striking climbing roses of recent introduction. It originated in Germany and is the result of several crossings between the well known Crimson Rambler, Tea and Polyantha roses, and for beauty and novelty surpasses anything yet produced.

The flowers appear in large clusters, each individual flower measuring an inch and one-half or more across, changing from a delicate rosy pink to rosy carmine, thus giving the effect of bearing many-colored blooms on the same bush, and a single cluster is a bouquet in itself. Another decided point of merit is the fact that it remains a long time in flower, covering a period of nearly two months.

The plant is a strong grower, absolutely hardy, nearly thornless, and decidedly the best to plant where a strong climber is desired. The shining dark-green foliage is most beautiful, and exempt from attacks of insects and mildew. It has received many awards of merit and been pronounced by many experts the most wonderful rose yet produced.

Raspberries From June Until November.

*Plant St. Regis Everbearing for Profit.
The Greatest Moneymaker yet introduced. Full Crops For Four Months.*

The above photo was taken in our nurseries October 2nd. 1912 and shows a portion of our field of St. Regis Raspberries. Note the size of the plants, the strong vigorous canes and healthy foliage. These are strong two-year transplants, and the identical plants we will ship this spring. Plants will be strictly Fresh Dug in the spring, will bear fruit this coming summer.
